Macro-Level Learning through Massive Open Online Courses (MOOCs): Strategies and Predictions for the Future McKay, Elspeth, Lenarcic, John, 2015-03-31 To some in academia Massive Open Online Courses are a paradigm shift in online education while others perceive them as a threat to traditional styles of pedagogy In this regard the time honored model of the university lecture is seen as being a potential casualty of the rise of MOOCs Macro Level Learning through Massive Open Online Courses MOOCs Strategies and Predictions for the Future provides insight into the emerging phenomenon of MOOCs as a design manual for the course designer with a collection of chapters that deal with all facets of the MOOC debate Industry training developers corporate trainers educators post graduate students and others will benefit from the information provided in this book High Efficiency Video Coding and Other Emerging Standards K.R. Rao, J.J. Hwang, D.N. Kim, 2022-09-01 High Efficiency Video Coding and Other Emerging Standards provides an overview of high efficiency video coding HEVC and all its extensions and profiles There are nearly 300 projects and problems included and about 400 references related to HEVC alone Next generation video coding NGVC beyond HEVC is also described Other video coding standards such as AVS2 DAALA THOR VP9 Google DIRAC VC1 and AV1 are addressed and image coding standards such as JPEG JPEG LS JPEG2000 JPEG XR JPEG XS JPEG XT and JPEG Pleno are also listed Understanding of these standards and their implementation is facilitated by overview papers standards documents reference software software manuals test sequences source codes tutorials keynote speakers panel discussions reflector and ftp web sites all in the public domain Access to these categories is also provided **Advances in Computer, Communication, Control and Automation** Yanwen Wu, 2011-11-20 The volume includes a set of selected papers extended and revised from the 2011 International Conference on Computer Communication Control and Automation 3CA 2011 2011 International Conference on Computer Communication Control and Automation 3CA 2011 has been held in Zhuhai China November 19 20 2011 This volume topics covered include signal and Image processing speech and audio Processing video processing and analysis artificial intelligence computing and intelligent systems machine learning sensor and neural networks knowledge discovery and data mining fuzzy mathematics and Applications knowledge based systems hybrid systems modeling and design risk analysis and management system modeling and simulation We hope that researchers graduate students and other interested readers benefit scientifically from the proceedings and also find it stimulating in the process *Benchmarking Working Europe 2015* Institut syndical européen pour la recherche, la formation et la santé et sécurité, 2015-04-01 Published every year the report analyses the state of working Europe explaining with the aid of statistics and graphs the main trends in terms of Europe s macro economic situation its labour market development the situation of wages and collective bargaining and worker participation The focus of this year s Benchmarking report is on the lessons learned or not learned from eight years of economic crisis and austerity policy The findings point to policy failures and to the need to redefine alternatives in order to

get Europe back on a sustainable growth path The deterioration of the labour market and social situation in the EU along with the appointment of a new Commission last autumn have led to some renewed policy initiatives that seek to restore growth as a means of addressing the situation The most notable of these initiatives is the Annual Growth Survey with its three pillars the Investment Plan fiscal responsibility and structural reforms [Proceedings Michel Verleysen,2015](#)

Versatile Video Coding: Latest Advances in Video Coding Standards Ochoa Dominguez, Humberto,Rao, Kamisetty R.,2019-03-08 Video is the main driver of bandwidth use accounting for over 80 per cent of consumer Internet traffic Video compression is a critical component of many of the available multimedia applications it is necessary for storage or transmission of digital video over today s band limited networks The majority of this video is coded using international standards developed in collaboration with ITU T Study Group and MPEG The MPEG family of video coding standards begun on the early 1990s with MPEG 1 developed for video and audio storage on CD ROMs with support for progressive video MPEG 2 was standardized in 1995 for applications of video on DVD standard and high definition television with support for interlaced and progressive video MPEG 4 part 2 also known as MPEG 2 video was standardized in 1999 for applications of low bit rate multimedia on mobile platforms and the Internet with the support of object based or content based coding by modeling the scene as background and foreground Since MPEG 1 the main video coding standards were based on the so called macroblocks However research groups continued the work beyond the traditional video coding architectures and found that macroblocks could limit the performance of the compression when using high resolution video Therefore in 2013 the high efficiency video coding HEVC also known and H 265 was released with a structure similar to H 264 AVC but using coding units with more flexible partitions than the traditional macroblocks HEVC has greater flexibility in prediction modes and transform block sizes also it has a more sophisticated interpolation and de blocking filters In 2006 the VC 1 was released VC 1 is a video codec implemented by Microsoft and the Microsoft Windows Media Video VMW 9 and standardized by the Society of Motion Picture and Television Engineers SMPTE In 2017 the Joint Video Experts Team JVET released a call for proposals for a new video coding standard initially called Beyond the HEVC Future Video Coding FVC or known as Versatile Video Coding VVC VVC is being built on top of HEVC for application on Standard Dynamic Range SDR High Dynamic Range HDR and 360 Video The VVC is planned to be finalized by 2020 This book presents the new VVC and updates on the HEVC The book discusses the advances in lossless coding and covers the topic of screen content coding Technical topics discussed include Beyond the High Efficiency Video CodingHigh Efficiency Video Coding encoderScreen contentLossless and visually lossless coding algorithmsFast coding algorithmsVisual quality assessmentOther screen content coding algorithmsOverview of JPEG Series [Seasonal to Decadal Prediction of Marine Ecosystems: Opportunities, Approaches, and Applications](#) Mark R. Payne,Alistair J. Hobday,Brian R. MacKenzie,Desiree Tommasi,2019-06-28 Tremendous advances in oceanographic observing and modeling systems over the last decade have led to unprecedented developments in the nature of information

available to marine science While improvements in observational technologies and networks have garnered much attention remarkable developments in forecasting the ocean have received much less focus Exploiting this new predictive skill to improve scientific understanding generate advice and aid in the management of marine resources is emerging as one of the new challenges of marine science Translating predictions of the physical environment into biological outcomes however is not straightforward Fisheries scientists for example have been trying to understand the links between physics and biology and generate predictions of variables such as recruitment for close to a century with limited success Nevertheless spatial distributions and the timing of key events which have received less focus are often tightly linked to the physical environment and may have management relevant applications The first such forecasts based on this skill are now starting to emerge This *Frontiers in Marine Science Research Topic* provides a snapshot of the state of the art in Marine Ecological Prediction It covers the opportunities for developing such forecasts technical approaches that could be employed and examples where the technology is already being applied This body of work therefore marks an important milestone on the route to developing this new and exciting field of marine science We Humans and the Intelligent Machines Jörg Dräger,Ralph

Planas,Arjan P. Palstra,Leonardo

J. Magnoni,2017-08-16 Swimming is an integral part of the life history of many fish species as is intimately linked with their

ability to express feeding and predator avoidance behaviors habitat selection and environmental preferences social and reproductive behaviors as well as migratory behaviors Therefore swimming is an important determinant factor of fitness in a true Darwinian sense and not surprisingly swimming performance has been often used as a measure of physiological fitness in fish The main aim of this Research Topic is to showcase some of the current studies designed to improve our understanding of the physiological energetic and metabolic requirements of swimming and of the adaptive responses to swimming in fish

Economic and fiscal outlook March 2011 Office for Budget Responsibility, 2011-03-23 The Office for Budget Responsibility was established to provide independent and authoritative analysis of the UK's public finances Part of this role includes producing the official economic and fiscal forecasts This report sets out forecasts for the period to 2015/16 The report also assesses whether the Government is on course to meet the medium term fiscal objectives and presents preliminary observations on the long run sustainability of the public finances Since the November 2010 outlook the key economic developments have been an unexpected fall in UK GDP in the final quarter of 2010 a rise in world oil prices and higher than expected UK inflation The labour market has performed as expected with unemployment rising The OBR endorse all but one of the costings for the tax and spending measures set out in Budget 2011 HC 836 ISBN 9780102971033 as reasonable central estimates though there are significant uncertainties around a number of them The central forecast for economic growth in 2011 is revised down from 2.1 to 1.7 per cent On the fiscal outlook OBR forecast that public sector net borrowing will decline steadily as share of national income but more slowly than forecast in November The Government set itself two medium term fiscal targets to balance the cyclically adjusted current budget by the end of a rolling five year period and to see public sector debt falling in 2015/16 Examining performance against these targets the OBR believe there is a greater than 50 per cent probability of meeting both targets under current policy

Paraguay International Monetary Fund. Western Hemisphere Dept., 2015-02-20 This 2014 Article IV Consultation highlights that economic activity in Paraguay has slowed from record high growth in 2013 but remains buoyant Construction manufacturing and services led the expansion in 2014 whereas electricity production declined and re exports suffered from weak growth in Brazil Full year growth is estimated to have slightly exceeded 4 percent Real GDP is projected to remain close to 4 percent in 2015 Weak trading partner growth and lower export prices cloud the outlook and agricultural production is projected to rise only marginally above the high level of 2014

The FIRE Economy Jane Kelsey, 2015-07-13 The FIRE economy built on finance insurance and real estate is now the world's principal source of wealth creation Its rise has transformed our political economic and social landscapes supported by a neoliberal regime that celebrates markets profit and risk From rising inequality and ballooning household debt to a global financial crisis and fiscal austerity the neoliberal orthodoxy has brought instability and empowered the few Yet it remains remarkably resilient even resurgent in New Zealand and abroad In 1995 Jane Kelsey set out a groundbreaking account of the neoliberal revolution in *The New Zealand Experiment* Now she marshals an exceptional range of evidence to show how this transfer of wealth and power has been systematically embedded over three decades Today organisations and commentators once at the vanguard of neoliberal reform including the IMF and Financial Times journalist Martin Wolf are warning the current model is unsustainable A post neoliberal era beckons In *The FIRE Economy* Kelsey identifies the risks posed by FIRE and the barriers embedded

Frontiers of Sulfur Metabolism in Plant Growth, Development, and Stress Response Stanislav Kopriva, Dibyendu Talukdar, Hideki Takahashi, Rüdiger Hell, Agnieszka Sirko, Stanislaus F. D' Souza, Tulika Talukdar, 2016-09-07 Growing plants have a constitutive demand for sulfur to synthesize proteins, sulfolipids and other essential sulfur containing molecules for growth and development. The uptake and subsequent distribution of sulfate is regulated in response to demand and environmental cues. The importance of sulfate for plant growth and vigor and hence crop yield and nutritional quality for human and animal diets has been clearly recognized. The acquisition of sulfur by plants however has become an increasingly important concern for the agriculture due to the decreasing S emissions from industrial sources and the consequent limitation of inputs from atmospheric deposition. Molecular characterization involving transcriptomics, proteomics and metabolomics in *Arabidopsis thaliana* as well as in major crops revealed that sulfate uptake, distribution and assimilation are finely regulated depending on sulfur status and demand and that these regulatory networks are integrated with cell cycle, photosynthesis, carbohydrate metabolism, hormonal signaling, uptake and assimilation of other nutrients etc to enable plant growth, development and reproduction even under different biotic and abiotic stresses. This knowledge can be used to underpin approaches to enhance plant growth and nutritional quality of major food crops around the world. Although considerable progress has been made regarding the central role of sulfur metabolism in plant growth, development and stress response, several frontiers need to be explored to reveal the mechanisms of the cross talk between sulfur metabolism and these processes. In this research topic, the knowledge on plant sulfur metabolism is reviewed and updated. Focus is put not only on molecular mechanisms of control of sulfur metabolism but also on its integration with other vital metabolic events. The topic covers 4 major areas of sulfur research: sulfate uptake, assimilation and metabolism, regulation and role in stress response. We hope that the topic will promote interaction between researchers with different expertise and thus contribute to a more integrative approach to study sulfur metabolism in plants.

High Performance Computing Julian M. Kunkel, Thomas Ludwig, 2015-06-19 This book constitutes the refereed proceedings of the 30th International Conference ISC High Performance 2015, formerly known as the International Supercomputing Conference, held in Frankfurt, Germany, in July 2015. The 27 revised full papers presented together with 10 short papers were carefully reviewed and selected from 67 submissions. The papers cover the following topics: cost efficient data centers, scalable applications, advances in algorithms, scientific libraries, programming models, architectures, performance models and analysis, automatic performance optimization, parallel I/O and energy efficiency.

ISTFA 2014 A. S. M. International, International Symposium for Testing and Failure Analysis, 2014-11-01 This volume features the latest research and practical data from the premier event for the microelectronics failure analysis community. The papers address the symposium's theme: Exploring the Many Facets of Failure Analysis.

The Econocracy Joe Earle, Cahal Moran, Zach Ward-Perkins, 2017-07-06 A century ago

the idea of the economy didn't exist. Now economics is the supreme ideology of our time with its own rules and language. The trouble is most of us can't speak it. This is damaging democracy. Dangerous agendas are hidden inside mathematical wrappers. Controversial policies are presented as proven by the models of economic science. Government is being turned over to a publicly unaccountable technocratic elite. The Econocracy reveals that economics is too important to be left to the economists and shows us how we can begin to participate more fully in the decisions which affect all our futures.
