

The Respiratory System

Your respiratory system brings

Problems with your respi

The Parts of the

The respiratory system is made up of

- Nose
- Pharynx (throat)
- Larynx (voice box)
- Trachea (windpipe)
- Bronchi (primary branching from trachea to smaller bronchioles)
- Alveoli

Right and Left Lungs

Our respiratory system has the main part where air enters the body. Internal (anterior) and external (posterior) views.

The nasal cavity is made up of nasal septum, bone and hyaline cartilage. The nasal cavity is made up of nasal septum, bone and hyaline cartilage.

Air is warmed or cooled to match the temperature, moistened and filtered before entering the lungs.

BREATHE IN... BREATHE

The Mechanisms of

Right and left lungs. Right is more acute (in depth and shape) than left lung. Left lung is smaller and narrower.

- Diaphragm
- Intercostal muscles
- External intercostal muscles
- Internal intercostal muscles
- External intercostal muscles
- Internal intercostal muscles

The Mechanisms of

Right and left lungs. Right is more acute (in depth and shape) than left lung. Left lung is smaller and narrower.

The Mechanisms of

Right and left lungs. Right is more acute (in depth and shape) than left lung. Left lung is smaller and narrower.

A diagram showing the trachea and bronchi.

BREATHE IN... BREATHE OUT

The mechanisms of respiration. Inhalation and deflation of the lungs ensure that regular exchange of gases takes place, however this is dependent on the arrangement of the pleura, the contraction and relaxation of the muscles of respiration and the elastic connective tissue.

Muscles of Respiration

During normal quiet breathing the muscles involved are:

- Diaphragm
- Intercostal muscles
- External intercostal muscles
- Internal intercostal muscles

Inhalation - The muscles of respiration contract and utilize energy to do so, this is an **active** process as it uses energy. Inhalation last approximately 2 seconds.

The diaphragm contracts when contracted, increasing the thoracic cavity. As the volume increases, the pressure inside decreases, resulting in **negative pressure**, since the negative pressure is below atmospheric pressure, air is drawn in.

Exhalation - A **passive** process, doesn't use energy. Relaxation of the **external intercostal muscles** allows the rib cage to move down and in and the **relaxation of the diaphragm** reduces the size of the thoracic cavity. As the volume decreases the pressure in the thoracic cavity, resulting in **positive pressure**, since it is greater than atmospheric pressure, air is forced out.

Factors Affecting Respiration

- Compliance:** Ease of stretching of the connective tissues in the lungs with increased breathing effort.
- Distensibility:** Measure of the distensibility. High compliance, lung will expand easily. Low compliance, lung will not expand to capacity.
- Elasticity:** Measure of the elasticity.
- Resistance:** Measure of the resistance.
- Viscosity:** Measure of the viscosity.
- Surface tension:** Measure of the surface tension.

Lung Volumes

- Residual Volume:** The volume of air that remains in the lungs after a maximal expiration.
- Tidal Volume:** The volume of air that enters and leaves the lungs during normal breathing.
- Inspiratory Reserve Volume:** The extra amount of air that can be inhaled into the lungs during maximal inspiration.
- Expiratory Reserve Volume:** The extra amount of air that can be expired during maximal expiration.
- Vital Capacity:** The maximum amount of air that can be expired during maximal expiration.
- Functional Residual Capacity:** The volume of air that remains in the lungs after a normal expiration.
- Total Lung Capacity:** The maximum amount of air that can be inhaled into the lungs during maximal inspiration.

Respiratory Patterns

- Normal:** Normal, unaltered breathing.
- Apnea:** No breathing.
- Hyperventilation:** An abnormally rapid breathing rate of more than 20 breaths per minute.
- Bradypnea:** An abnormally slow rate of breathing.

Composition of Inspired and Expired Air

	Inspired Air	Expired Air
Oxygen	21%	16%
Carbon Dioxide	0.04%	4%
Nitrogen	78%	78%
Water Vapor	Variable	Saturated

BREATHE IN... BREATHE OUT... BREATHE IN... BREATHE OUT...
