Religion, Law, and the Land Brian E. Brown, 1999-11-30 Examining a series of court decisions made during the 1980s regarding the legal claims of several Native American tribes who attempted to protect ancestrally revered lands from development schemes by the federal government this book looks at important questions raised about the religious status of land The tribes used the First Amendment right of free exercise of religion as the basis of their claim since governmental action threatened to alter the land which served as the primordial sacred reality without which their derivative religious practices would be meaningless Brown argues that a constricted notion of religion on the part of the courts combined with a pervasive cultural predisposition towards land as private property marred the Constitutional analysis of the courts to deprive the Native American plaintiffs of religious liberty Brown looks at four cases which raised the issue at the federal district and appellate court levels centered on lands in Tennessee Utah South Dakota and Arizona then it considers a fifth case regarding land in northwestern California which ultimately went to the U S Supreme Court In all cases the author identifies serious deficiencies in the judicial evaluations The lower courts applied a conception of religion as a set of beliefs and practices that are discrete and essentially separate from land thus distorting and devaluing the fundamental basis of the tribal claims It was this reductive fixation of land as property implicit in the rulings of the first four cases that became explicitly sanctioned and codified in the Supreme Court's decision in *Lyng v Northwest Indian Cemetery Protective Association* of 1988 In reaching such a position the Supreme Court injudiciously engaged in a policy determination to protect government land holdings and did so through a shocking repudiation of its own long established jurisprudential procedure in cases concerning the free exercise of religion

Man Who Thought He Owned Water Tershia d'Elgin,2016-08-15 The Man Who Thought He Owned Water is author Tershia d Elgin s fresh take on the gravest challenge of our time how to support urbanization without killing ourselves in the process The gritty story of her family s experience with water rights on its Colorado farm provides essential background

about American farms food and water administration in the West in the context of growing cities and climate change

Enchanting and informative *The Man Who Thought He Owned Water* is an appeal for urban rural cooperation over water and resiliency When her father bought his farm Big Bend Station he also bought the ample water rights associated with the land and the South Platte River confident that he had secured the necessary resources for a successful endeavor Yet water immediately proved fickle hard to defend and sometimes dangerous Eventually those rights were curtailed without compensation Through her family s story d Elgin dramatically frames the personal scale implications of water competition revealing how water deals infrastructure transport and management create economic growth but also sever human connections to Earth s most vital resource She shows how water flows to cities at the expense of American grown food as rural land turns to desert wildlife starves the environment degrades and climate change intensifies Depicting deep love obsession and breathtaking landscape *The Man Who Thought He Owned Water* is an impassioned call to rebalance our relationship with water It will be of great interest to anyone seeking to understand the complex forces affecting water resources food supply food security and biodiversity in America

Tracking Rural Change Francesca Merlan, David Raftery, 2009-04-01 A key intensifying change affecting rural areas in the last few decades has been a decline in the proportion of national populations whose principal livelihood is farming The corresponding re distribution of population has typically resulted in a net population loss to rural areas and diversification of rural activity The corporatization and technological modification of food production has prompted new policy challenges and has bound rural and urban populations together in new relationships articulated in moral discourses of custodianship food safety and sustainability Contributors to this volume came together in the attempt to stimulate collective insight into trends of rural change in Australia New Zealand and Europe The first two countries have been characterised by avowedly neoliberal rural policy with considerable departures from it in practice Europe on the other hand by a mix of policy measures which attempt to integrate land management and sustainability diversification and maintenance of a competitive farming sector within an overarching policy framework more overtly though only partially oriented towards sustaining rural society Aiming to build on research relating to the character of rural transitions this volume offers substantive and critical contributions to the understanding of the sources of unpredictability instability and continuity that underpin rural transition The papers explore changes and continuities in policy the governance of rural spaces technological developments relating to rural areas and populations and social forms of subjectivation and participation in increasingly diverse rural settings

Peckinpah's Tragic Westerns John L. Simons,Robert Merrill,2014-01-10 The work of Sam Peckinpah represents a high point in American cinema This text is the first theoretical and critical attempt to place Peckinpah within the 2 000 year old tradition of western tragedy The tradition enfolding the Greeks Shakespeare and modern tragedians is represented in Peckinpah s art in numerous ways and the fact that he worked in the mode throughout his career distinguishes him from most American film directors Films covered include Ride the High Country Noon Wine The Wild Bunch Pat Garrett and Billy the Kid and Bring Me the Head of Alfredo Garcia

Rangelands: A Resource Under Siege P. J. Joss,P. W. Lynch,O. B. Williams,1986 This volume comprises the proceedings of the Second International Rangelands Congress held in Adelaide Australia in May 1984 and includes some 350 contributions drawn from 43 different countries The Congress addressed the problem of the conflict between land users and the degradation of this valuable resource Some 40% of the Earth s land surface is and or alpine and therefore unsuitable for agricultural cultivation Collectively these lands are known as rangelands and in their natural state they constitute a habitat for grazing animals both domestic and wild Despite their low productivity rangelands have been used for thousands of years as a source of food and fibre but other uses such as mining tourism recreation and conservation are exerting increasing demands The result is often conflict between land users and degradation of the resource
