Name: Ngo Van Vinh

Agency: The People's Police Academy

Ha Noi, 01 December 2010

Dear Sir/ Madam

Having been well graduated from high school with a great mark, I took part in the entrance university examination in 2003. After pass over thousands other candidates, I became a student of the People's Police Academy, one of the best training institution of Viet Nam Police Force. I gained high mark and was put into the High Quality Class. I chose the major of investigation as my future profession. I must say that my great passion in my life is to become a policeman; it was my dream when I was a small child, it has always been and I would rather than any more. That is the reason why I always tried my best to study hard.

In my class, the Academy gave us all best conditions and facilities to study. During the period of 5-year-course, I got the outstanding results and was highly appreciated by all teachers and classmates. I wrote many scientific articles on the Academy's Magazine. The program education was always full with different subjects such as: Politic, legal forensic, criminal law, criminal procedure law... and of cause that contribute us comprehensive knowledge.

Moreover, all student in the Academy and I am not exceptional case, had to complete exercises, martial art and especially spent a certain time for practicing in some local police stations. I got efficiently an excellent achievement and then became teacher of People's Police Academy.

Now, I am working in the Basic Professional Skill Department, one of the most important and fundamental departments of the Academy. We contribute to students all the basic knowledge about police force and the main professional skills such as: history of police force, basic investigation, leadership operation, and professional record...I always try my best to get news, new law text and knowledge for my lesson in the class. In my office, I work hard, effectively and always update the new

Faculty and First-Generation College Students: Bridging the Classroom Gap Together Vickie L. Harvey, Teresa Heinz Housel, 2011-10-11 From the Editor The population of first generation college students FGS is increasing in an ever tightening economy a time when employers demand a college degree even for an initial interview According to a 2007 study by UCLA's Higher Education Research Institute nearly one in six freshmen at American four year institutions is first generation However FGS often straddle different cultures between school and home and many feel socially ethnically academically and emotionally marginalized on campus Because of these disparities FGS frequently encounter barriers to academic success and require additional campus support resources Some institutions offer increased financial aid and loan free aid packages to FGS but these remedies although welcome do not fully address the diverse and complex challenges that these students experience Responding to these complexities this volume's chapters extend previous research by examining the multiple transitions experienced by both undergraduate and graduate FGS This volume's cutting edge research will help college and university administrators faculty and staff work better with FGS through more effective pedagogy and

institutional programs Ultimately this volume affirms how learning communities are strengthened when they include diverse student populations such as FGS and meet their particular emotional academic and financial needs Change and Development Eric Amsel, K. Ann Renninger, Ann Renninger, 2013-05-13 This book and the symposium on which it was based were designed to cross the boundaries of subdiscipline and theoretical orientation to address four critical issues in understanding development explanation of change and development the nature and process of change forms of variability in performance and the promotion of change through application The chapters suggest that change and development in target systems from cells to selves may not be explainable assessable or promotable without careful reference to the context social and otherwise of the system and that the process of change and development may involve variability of the system in addition to periods of stability Together the chapters harken back to the spirit of the grand theory Instead of proposing a grand theory they provide an excellent foundation for considering the importance of an individual's or particular group's context and variability and discussions to facilitate thinking about what still needs to be worked out **The ... Yearbook of the National Reading Conference** National Reading Conference (U.S.). Meeting, 1995 **The Only Woman in the Room** Eileen Pollack, 2016-09-06 ONE OF WASHINGTON POST'S NOTABLE NONFICTION BOOKS OF THE YEAR A bracingly honest exploration of why there are still so few women in STEM fields beautifully written and full of important insights Washington Post In 2005 when Lawrence Summers then president of Harvard asked why so few women even today achieve tenured positions in the hard sciences Eileen Pollack set out to find the answer A successful fiction writer Pollack had grown up in the 1960s and 70s dreaming of a career as a theoretical astrophysicist Denied the chance to take advanced courses in science and math she nonetheless made her way to Yale There despite finding herself far behind the men in her classes she went on to graduate summa cum laude with honors as one of the university's first two women to earn a bachelor of science degree in physics And yet isolated lacking in confidence starved for encouragement she abandoned her ambition to become a physicist Years later spurred by the suggestion that innate differences in scientific and mathematical aptitude might account for the dearth of tenured female faculty at Summer's institution Pollack thought back on her own experiences and wondered what if anything had changed in the intervening decades Based on six years interviewing her former teachers and classmates as well as dozens of other women who had dropped out before completing their degrees in science or found their careers less rewarding than they had hoped *The Only Woman in the Room* is a bracingly honest no holds barred examination of the social interpersonal and institutional barriers confronting women and minorities in the STEM fields This frankly personal and informed book reflects on women's experiences in a way that simple data can't documenting not only the more blatant bias of another era but all the subtle disincentives women in the sciences still face *The Only Woman in the Room* shows us the struggles women in the sciences have been hesitant to admit and provides hope for changing attitudes and behaviors in ways that could bring far more women into fields in which even today they remain seriously underrepresented **Educational**

Getting to Know Ourselves and Others Through the ABCs Claudia Finkbeiner, Althier Lazar, 2015-01-01 This book is a valuable resource for teachers and other professionals who are looking for a proven way to increase cultural appreciation and awareness New applications of the ABCs model of Cultural Understanding and Communication are presented and discussed in this new volume based on studies done in the United States and Canada and Europe In this ground breaking project the authors describe how the ABCs model complicated and challenged and changed the cultural perceptions of those who participated in it even those who were initially highly resistant to such possibilities At the heart of the project is the exchange of narratives life stories that give insight into the cultural worlds of selves and others In addition to the narratives other instruments including the Transcultural Competence Scale TCC provide further evidence of the positive impact of the ABCs on participants receptivity toward cultural differences In the TRANSABCs project

researchers from both sides of the Atlantic invited teacher candidates students who will become workplace and other professionals to write an autobiography A of themselves from various cultural perspectives a biography B of an individual who is culturally different from themselves along particular dimensions and to use these documents to conduct cross cultural comparisons C between themselves and the person they interviewed Furthermore candidates developed culturally responsive ideas for the school or the workplace C These exchanges and analyses produced epiphanies and insights that translated into specific actions to improve cultural understanding and communication in classrooms and workplaces Educators and professionals can take from these examples to inspire their own personal journey toward greater cultural understanding and sensitivity
