

# Food test exam questions

1. The table below shows six statements that apply to biochemical tests.

Complete the table to show which of these statements apply to the biochemical tests carried out on the substances listed.

Fill in each box using a tick (✓) to show that the statement applies or a cross (✗) if it does not. The first row has been completed for you.

| substance          | statement |                    |                        |                         |  |                                  |
|--------------------|-----------|--------------------|------------------------|-------------------------|--|----------------------------------|
|                    | use heat  | use biuret reagent | use Benedict's reagent | boil with a dilute acid | a positive result is a blue-black colour | a positive result is an emulsion |
| lipid              | ✗         | ✗                  | ✗                      | ✗                       | ✗  | ✓                                |
| protein            |           |                    |                        |                         |  |                                  |
| starch             |           |                    |                        |                         |  |                                  |
| reducing sugar     |           |                    |                        |                         |  |                                  |
| non-reducing sugar |           |                    |                        |                         |  |                                  |
