

A QUALITATIVE RESEARCH PROPOSAL: AN ALTERNATIVE FORMAT

Anas Yasin

Introduction

Qualitative research is viewed as an inquiry process based on building holistic, complex understanding of a social problem. It is characterized by data collection in a natural setting where the researcher acts as a key instrument. The research contains a deep, rich description and is more concerned with process than specifying outcomes or products. Generally, the data are analyzed in an inductive process to provide meaning to the research consumer (Wainwright, 1997)

Before pinning down a format of a qualitative proposal for researches in language teaching, three important basic principles in qualitative practices—qualitative approaches, qualitative methods, and qualitative validity—should be clarified.

Qualitative Approaches

A qualitative "approach" is a general way of thinking about conducting qualitative research. It describes, either explicitly or implicitly, the purpose of the qualitative research, the role of the researcher(s), the stages of research, and the method of data analysis. Here, three of the major qualitative approaches are introduced.

Ethnography

The ethnographic approach to qualitative research comes largely from the field of anthropology. The emphasis in ethnography is on studying an entire culture. Originally, the idea of a culture was tied to the notion of ethnicity and geographic location (e.g., the culture of the Trobriand Islands), but it has been broadened to include virtually any group or organization. That is, we can study the "culture" of a business or defined group (e.g., a Rotary club).

Ethnography is an extremely broad area with a great variety of practitioners and methods. However, the most common ethnographic approach is participant observation as a part of field research. The ethnographer becomes immersed in the culture as an active participant and records extensive field notes. As in grounded theory, there is no preset limiting of what will be observed and no real ending point in an ethnographic study.

Phenomenology

Phenomenology is sometimes considered a philosophical perspective as well as an approach to qualitative methodology. It has a long history in several social research disciplines including psychology, sociology and social work. Phenomenology is a school of thought that emphasizes a focus on people's subjective experiences and interpretations of the world. That is, the phenomenologist wants to understand how the world appears to others.

Social Research Methodology and New Techniques in Analysis,

Interpretation, and Writing Islam, M. Rezaul, 2018-12-07 The importance of scientific investigation and research is becoming more pronounced in today's society with many organizations relying on this research to make informed decisions. As such, research methodology courses have been integrated into undergraduate and master's programs at most academic institutions where students are being challenged to conduct and write research. *Social Research Methodology and New Techniques in Analysis: Interpretation and Writing* is a pivotal reference source that provides vital research on the main concepts of research writing, including the guidelines of research methodology and proposal designing. While highlighting topics such as mixed method research, research objectives, and project proposals, this publication provides examples of eight PhD proposals and the frameworks used in organizing qualitative, quantitative, and mixed method research. This book is ideally designed for graduate level students, academicians, researchers, educators, scholars, education administrators, and policymakers seeking current research on the key steps and techniques used in organizing social research proposals. [How to Write about Economics and Public Policy](#) Katerina Petchko, 2018-07-12 *How to Write about Economics and Public Policy* is designed to guide graduate students through conducting and writing about research on a wide range of topics in public policy and economics. This guidance is based upon the actual writing practices of professional researchers in these fields, and it will appeal to practitioners and students in disciplinary areas such as international economics, macroeconomics, development economics, public finance, policy studies, policy analysis, and public administration. Supported by real examples from professional and student writers, the book helps students understand what is expected of writers in their field and guides them through choosing a topic for research to writing each section of the paper. This book would be equally effective as a classroom text or a self-study resource. Teaches students how to write about qualitative and quantitative research in public policy and economics in a way that is suitable for academic consumption and that can drive public policy debates. Uses the genre-based approach to writing to teach discipline-appropriate ways of framing problems, designing studies, and writing and structuring content. Includes authentic examples written by students and international researchers from various sub-disciplines of economics and public policy. Contains strategies and suggestions for textual analysis of research samples to give students an opportunity to practice key points explained in the book. Is based on a comprehensive analysis of a research corpus containing 400 research articles in various areas of public policy and economics. [Doing Qualitative Research](#) David Silverman, 2013-04-22 In the fourth edition of his best-selling textbook, David Silverman provides a step-by-step guide to planning and conducting qualitative research. Using real examples from real postgraduate students, the book makes it easy to link theory to methods and shows how to move from understanding the principles of qualitative research to doing it yourself. The new edition has been fully updated and now includes a brand new chapter on formulating a research question appropriate for qualitative research, an expanded discussion of the role of theory in research, extended discussion of case study research, and the number of cases needed for effective qualitative research, further coverage of focus groups, and
