Tales from Albarado Smoki Musaraj, 2020-08-15 Tales from Albarado revisits times of excitement and loss in early 1990s Albania in which about a dozen pyramid firms collapsed and caused the country to fall into anarchy and a near civil war To gain a better understanding of how people from all walks of life came to invest in these financial schemes and how these schemes became intertwined with everyday transactions dreams and aspirations Smoki Musaraj looks at the materiality sociality and temporality of financial speculations at the margins of global capital She argues that the speculative financial practices of the schemes were enabled by official financial infrastructures such as the postsocialist free market reforms by unofficial economies such as transnational remittances as well as by historically specific forms of entrepreneurship transnational social networks and desires for a European modernity Overall these granular stories of participation in the Albanian schemes help understand neoliberal capitalism as a heterogeneous economic formation that intertwines capitalist and noncapitalist forms of accumulation and

Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates *London's Aylesbury Estate* Michael Romyn, 2020-09-18

This book looks beyond the Aylesbury's public face by examining its rise and fall from the perspective of those who knew it based largely on the oral testimony and memoir of residents and former residents youth and community workers borough Councillors officials police officers and architects What emerges is not a simple story of definitive failures but one of texture and complexity struggle and accord family and friends and of rapidly changing circumstances The study spans the years 1967

to 2010 from the estate's ambitious inception until the first of its blocks were pulled down. It is a period rarely dealt with by historians of council housing who have typically confined themselves to the years before or after the 1979 watershed. As such, it demonstrates how shifts in housing policy and broader political, economic and social developments came to bear on a working class community for good and more especially for ill.

Climate-resilience policies and investments for Egypt's agriculture sector: Sustaining productivity and food security Perez, Nicostrato D., Kassim, Yumna, Ringler, Claudia, Thomas, Timothy S., ElDidi, Hagar, Breisinger, Clemens, 2021-09-24. The importance of a resilient agriculture sector in providing food security, livelihoods and household income was highlighted in many countries by the recent pandemic, as was the capacity of the sector to cushion the negative impacts of the subsequent economic slowdown. This has been the case in Egypt where agriculture has been resilient to the health crisis in comparison with the service and industry sectors (Breisinger et al. 2020). However, the sector's resiliency is gradually being corroded by climate change with lasting harmful effects for agriculture and food systems.
