QUESTION 1 [20]

Discuss the risk factors for, the pathogenesis of, and the consequences of, coronary artery atherosclerosis and comment on the possible causes and the subsequent pathologic findings that could occur with a total serum cholesterol of 268 mg/dl.

In the cardiovascular diseases called Coronary artery atherosclerosis, there is an accumulation of inflammatory cells, fatty deposits and cholesterol and other substance within the walls of coronary arteries. This accumulation will cause the arteries to harden and become narrow reducing the amount of blood flow to the heart. This can cause diseases like angina or myocardial infarctions.

Risk Factors for Coronary Artery Atherosclerosis:

1. **High Blood Cholesterol Levels:** Elevated levels of low-density lipoprotein cholesterol (LDL-C) and total cholesterol are significant risk factors. A total serum cholesterol level of 268 mg/dl is considered high. LDL cholesterol can deposit in the arterial walls and initiate atherosclerotic plaque formation.
2. **Hypertension:** High blood pressure can damage the inner lining of arteries, making them more susceptible to plaque formation.
3. **Smoking:** Smoking tobacco products can cause damage to the blood vessel walls, and oxidative stress leading to inflammation and increased plaque buildup.
4. **Diabetes:** diabetic patients have a higher risk of atherosclerosis due to elevated blood sugar levels, which can damage blood vessels over time and lead to metabolic disturbance.
5. **Obesity:** Excess body weight, especially abdominal obesity, insulin resistance and inflammation, is associated with an increased risk of atherosclerosis.

Michaelsen, Michael Sweet, Dean X. Parmelee, 2008. Team Based Learning (TBL) is a unique form of small group learning designed in and for the college classroom. TBL is a special combination of incentives and corrective feedback that quickly transforms groups into high performance learning teams with no time taken from the coverage of course content. In this issue, the authors describe the practical elements of TBL, how it can look in the classroom, and what they have learned as it has grown into an interdisciplinary and international practice. Chapters discuss: The Essential Elements of Team Based Learning; The Social Foundation of Team Based Learning; Students Accountable to Students; Knowledge is No Longer Enough; Enhancing Professional Education with Team Based Learning; Teaching Skills for Facilitating Team Based Learning; Peer Assessment and Evaluation in Team Based Learning; Technological Alternatives to Paper-Based Components of Team Based Learning; Team Based Learning in Asynchronous Online Settings. Importantly, TBL is not about teaching but about learning. Several articles in this volume illustrate this emphasis by using TBL students' own words to reinforce key ideas. This is the 116th volume of the Jossey-Bass quarterly report series *New Directions for Teaching and Learning*, which offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

[Phlebotomy Exam Review](#) Ruth E. McCall, 2023-08-15. *Phlebotomy Exam Review*, Eighth Edition, provides a comprehensive review of current phlebotomy theory and offers an ideal way to study for phlebotomy licensing or national certification exams. It also makes for an excellent study tool for students taking formal phlebotomy training programs. By answering the questions in this review, students can test their knowledge and application of current phlebotomy theory. Theory questions address recent federal safety standards, Clinical and Laboratory Standards Institute (CLSI) guidelines, and the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS) phlebotomist competencies when applicable. Questions are standard multiple choice like those used on national exams, with choices that often test your critical thinking abilities.
