

Name of discharging hospital:

Discharge Instruction Sheet for General Practitioners

Patient's name

Dear Dr

Your patient has been prescribed the oral anticoagulant Xarelto® (rivaroxaban, Bayer HealthCare Pharmaceuticals) for the treatment of DVT/PE [delete as appropriate] and the prevention of recurrent DVT and PE. This letter provides guidance regarding the care of your patient while they are receiving treatment with Xarelto. Please keep this letter for your records.

Some important information about Xarelto:

- **Contraindications to Xarelto include:**
 - Hypersensitivity
 - Clinically significant active bleeding
 - Lesion or condition at significant risk of major bleeding
 - Concomitant treatment with any other anticoagulant agent except under circumstances of switching
 - Hepatic disease associated with coagulopathy and clinically relevant bleeding risk including cirrhotic patients with Child–Pugh B and C
 - Pregnancy and breast feeding
- Xarelto is not recommended in patients who are concomitantly receiving systemic treatment with medications that increase Xarelto plasma concentrations and, therefore, increase the risk of bleeding. This includes (but is not limited to) azole-antimycotics and HIV protease inhibitors, which are both potent inhibitors of cytochrome P450 3A4 and P-glycoprotein
- Medications that decrease Xarelto plasma concentrations such as phenytoin, carbamazepine, phenobarbital and St John's wort, which are strong inducers of cytochrome P450 3A4 should be used with caution in patients taking Xarelto
- Xarelto should be used with caution in patients taking concomitant medications that may affect haemostasis, including ASA or NSAIDs
- Xarelto should be used with caution in conditions with increased risk of haemorrhage and is not recommended in patients with other risk factors for bleeding, including active ulcerative gastrointestinal disease.
- Xarelto is not recommended in patients with PE who are haemodynamically unstable or who may receive thrombolysis or pulmonary embolectomy
- Xarelto is not recommended for use in patients below 18 years of age
