Mengerian Microeconomics Ivan Jankovic, 2021-01-04 This book explores the neglected contribution of the American and English psychological school to economic theory especially to the development and refinement of the Austrian school of economics It argues that Frank Knight Frank Fetter Herbert Davenport Philip Wicksteed and J B Clark among others improved on the original Austrian theory by Menger and Bohm Bawerk by providing a coherent subjectivist foundation for the theories of production and distribution They succeeded where economic theory before them failed to develop the theories of interest profit wages and rents based solely on the principles of subjective value and marginal utility eschewing the last remnants of the old cost of production models This book represents a look at what mainstream economic theory might have looked like had the erasure of Mengerian Austrian price theory by Marshallian and Walrasian theories not taken place and had the improvements and refinements of the Mengerian tradition itself done by the Anglo Saxon followers of Menger been fully appropriated
