Solving Problems in Technical Communication Johndan Johnson-Eilola, Stuart A. Selber, 2024-05-31 The field of technical communication is rapidly expanding in both the academic world and the private sector yet a problematic divide remains between theory and practice Here Stuart A Selber and Johndan Johnson Eilola both respected scholars and teachers of technical communication effectively bridge that gap Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real world problems faced by practitioners problems involving ethics intercultural communication new media and other areas that determine the boundaries of the discipline The book is structured in four parts offering an overview of the field situating it historically and culturally reviewing various theoretical approaches to technical communication and examining how the field can be advanced by drawing on diverse perspectives Timely informed and practical Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career *Research in Technical Communication* Michael G. Moran, Debra Journet, 1985 This sourcebook demonstrates the vigorous work being done in the field of technical and scientific communication Collectively the essays offer researchers a basis from which to begin constructing the theoretical framework necessary for the study of technical communication The book begins with general concerns and progresses to particular applications The chapters comprising Part I outline larger theoretical perspectives from which to examine technical communication humanistic approaches to technical communication the history of technical communication communication theory and technical writing and the teaching of technical writing Part II examines the relationship of technical communication to traditional rhetorical concerns such as invention audience modes of organization and style Specific types of technical communication proposals reports and business correspondence among others are discussed in Part III The use of the computer oral presentations and specialized forms of technical communication are examined in Part IV The appendixes offer guides to textbooks and style manuals and an overview of the technical writing profession **New Essays in Technical and Scientific Communication** Paul Anderson, John Brockman, Carolyn Miller, 2019-03-08 New Essays in Technical and Scientific Communication represents the most important collection of writings about technical communications ever compiled Focusing on a wide range of theoretical and practical issues these essays reflect the rigor vitality and interdisciplinary nature of modern technical communications This represents a collection of the very best scholarly work being done **Journal of Technical Writing and Communication** , 1980 **Paralogic Rhetoric** Thomas Kent, 1993 Building on the ideas of philosophers and literary theorists such as Donald Davidson Richard Rorty Jacques Derrida Jean Francois Lyotard and Mikhail Bakhtin Thomas Kent investigates in Paralogic Rhetoric the role that interpretation plays in the acts of writing and reading Kent argues that both writing and reading as kinds of communicative interaction constitute thoroughly hermeneutic activities that cannot be reduced to discreet conceptual frameworks or to systemic processes of one

kind or another Kent calls his view of communicative interaction paralogic hermeneutics and he employs this notion to critique some of our most influential contemporary approaches to the study of writing and reading Kent develops his argument in two general stages In the first stage chapters one through four he discusses the meaning of the term paralogy and defines the concept of paralogic hermeneutics In addition he attacks in these chapters the claim endorsed by many rhetoricians and literary theorists that language conventions control the meaning of utterances and in place of the conventionalist formulation of communicative interaction Kent advocates an externalist account of meaning that attempts to move beyond the old Cartesian opposition of mind and world In stage two of his argument chapters five through seven Kent draws out some of the practical implications of a paralogic hermeneutics for the disciplines of rhetoric and literary criticism One of Kent s most provocative and important claims in these chapters concerns his assertion that the traditional disciplinary boundary existing between composition studies and literary studies evaporates once writing and reading are regarded as hermeneutic endeavors Finally Paralogic Rhetoric represents a frontal assault on some of the fundamental assumptions about writing and reading held by many of our most important contemporary rhetoricians and literary theorists Kent argues persuasively that the time has arrived for a reconsideration of our current conceptions concerning both the production and the reception of discourse and in these pages he proposes a description of communicative interaction that serves as a large first step toward a radical redescription of writing and reading
