The Only Way to Win Jim Loehr, 2012-05-15 The conditioning begins early in our lives. Great achievements will bring lasting happiness and fulfillment; great achievements form the bedrock of stable self-esteem and strong character; great achievements will become the foundation for a successful life. If these well-intentioned promises are true, why does winning never seem to be enough? In *The Only Way to Win*, Jim Loehr draws upon two decades of work with Fortune 500 executives, world-class athletes such as Monica Seles, Dan Jansen, and Eric Lindros, and other high achievers at the Human Performance Institute (HPI) to reveal surprising insights about achievement, motivation. Specifically, Loehr finds that the blind pursuit of external achievement often results in emptiness, addiction, and ironically, poor performance. It's not really about what you achieve; he argues, it's about who you become as a consequence of the chase. From the bestselling author of *On Form* comes a compelling, practical, and hopeful read filled with relatable stories and useful exercises. *The Only Way to Win* will serve as a powerful wake-up call for business leaders, employees, teachers, and coaches. It will also provide inspiration for readers looking to perform better, achieve more, and change both their own lives and those of the people they influence.

Rationalist Bias in Communication Theory Shedletsky, Leonard, 2021-06-04 While communication theory has not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists
