Poon,2023-07-03 Difficult Subjects Insights and Strategies for Teaching about Race Sexuality and Gender is a collection of essays from scholars across disciplines institutions and ranks that offers diverse and multi faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities Readers will find the collected essays useful for identifying new approaches to taking on the difficult subjects of race gender and sexuality The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects Contributors to this volume span a range of disciplines from criminal justice to gender

studies to organic chemistry and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider identity as constitutive of rather than divorced from their academic disciplines Discussions of race gender and sexuality are always hot button issues in the college classroom whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester long term Even seasoned professors who specialize in these areas find it difficult to talk about identity politics in a room full of students And many professors for whom issues of racial and sexual identity is not a primary concern find it even more challenging to raise these issues with students Offering reflections and practical guidance the book accounts for a range of challenges facing college educators and encourages faculty to teach with courage and conviction especially when it feels as though the world around us is crashing down upon our students and ourselves *Sugar rush* Karen Throsby,2023-06-20

In the second decade of the twenty first century the crusade against sugar rose to prominence as an urgent societal problem about which something needed to be done Sugar was transformed into the common enemy in a revived war on obesity levelled at unhealthy foods and the people who enjoy them Are the evils of sugar based on purely scientific fact or are other forces at play *Sugar rush* explores the social life of sugar in its rise to infamy The book reveals how competing understandings of the problem of sugar are smoothed over through appeals to science and the demonization of fatness with politics and popular culture preying on our anxieties about what we eat Drawing on journalism government policy public health campaigns self help books autobiographies and documentaries the book argues that this rush to blame sugar is a phenomenon of its time finding fertile ground in the era of austerity and its attendant inequalities Inviting readers to resist the comforting certainties of the attack on sugar *Sugar rush* shows how this actually represents a politics of despair entrenching rather than disrupting the inequality riddled status quo

Powering Science National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Space Studies Board,Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio,2018-01-29 NASA s Science Mission Directorate SMD currently operates over five dozen missions with approximately two dozen additional missions in development These missions span the scientific fields associated with SMD s four divisions Astrophysics Earth Science Heliophysics and Planetary Sciences Because a single mission can consist of multiple spacecraft NASA SMD is responsible for nearly 100 operational spacecraft The most high profile of these are the large strategic missions often referred to as flagships Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget technology and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs It considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly

balanced program containing a range of mission classes *Active Learning in College Science* Joel J. Mintzes, Emily M. Walter, 2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman's challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of naïve notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for **Teaching Science in the Block** Alvin Pettus, Myron Blosser, 2014-01-09 This book provides detailed instructional strategies sample lesson plans and sample assessments to help science teachers make the best use of the additional time available in a block schedule

High-Energy Astrophysics Research Enabled By The Probe-Class Mission Concept HEX-P Gabriele Ponti, Murray Brightman, Esra Bulbul, Renee Ludlam, Daniel Stern, Javier A. García, 2025-06-02 The Astro 2020 Decadal report Pathways to Discovery in Astronomy and Astrophysics for the 2020s identified the need for a new class of mission for the next decade that

fills the gap between a Mid sized Explorer MIDEX and Flagship Large mission The report specifically recommends that a cadence of one probe mission per decade with a cost cap of 1.5 billion balances scientific scope with timeliness NASA has followed this recommendation and opened a call for Astrophysics Probe Explorer APEX proposals restricted to either a far infrared or an X ray mission due in Fall 2023 with a planned launch date in no later than 2032 In response to this call the High Energy X ray Probe HEX P concept has been developed as a partnership between NASA's Jet Propulsion Laboratory JPL the California Institute of Technology Caltech and the NASA Goddard Space Flight Center GSFC with international partnership from the Italian Space Agency ASI Italy the German Space Agency DLR and the Max Planck Institute for Extraterrestrial Physics MPE Germany HEX P is a mission concept that offers sensitive broad band coverage from soft to hard X rays 0.2–80 keV with an exceptional combination of spectral timing and angular capabilities It features two high energy telescopes HETs that focus hard X rays and one low energy telescope LET that focuses lower energy X rays building upon the heritage of previous successful missions such as XMM Newton and NuSTAR With this leap in observational capability HEX P will be capable of addressing fundamental questions about the extreme environments around black holes and neutron stars map the growth of supermassive black holes and quantify the effect they have on their environments HEX P will resolve the hard X ray emission from dense regions of our Galaxy to understand the high energy source populations and investigate dark matter candidate particles through their decay channel signatures In this Frontiers Research Topic we present a collection of papers which delve into some of the most exciting scientific questions that can be addressed with a mission like HEX P The papers have been prepared by members of the HEX P collaboration which is organized into four main scientific pillars Black Hole Growth Accretion Power Stellar Evolution Time Domain and Multi Messenger Astronomy The individual papers cover a range of topics including The cosmic X ray background Seyfert galaxies Compton thick active galaxies and blazars Black hole binaries neutron stars magnetars ultraluminous X ray sources and tidal disruption events The physics of the X ray corona X ray populations in nearby galaxies Supernova remnants pulsar wind nebulae and nuclear astrophysics Galactic PeVatrons star clusters superbubbles microquasar jets and gamma ray binaries The Galactic Center Supermassive black spin measurements and dual active galaxies Pulsar Timing electromagnetic counterparts of gravitational wave sources and transient phenomena The main goal of this Research Topic is to present detailed modeling and simulations for a range of HEX P science cases in order to demonstrate the capabilities of HEX P in serving the astrophysics community in the next decade The members of the HEX P mission are welcome to present Original Research papers as well as any other kind of article types that fit their manuscript Please have a look at [here](#) to choose the appropriate article type to submit to this collection This Research Topic is organized by the researchers of the HEX P mission Authors and Guest Editors belong to the same consortium Furthermore Dr Daniel Stern and Dr Javier Garcia are the Principal Investigator and the Project Scientist of the mission respectively All manuscripts will be peer reviewed by researchers external to the collaboration
