

QUESTION 11

There are many cycles that occur globally. Water is found in oceans, ice caps, rivers and lakes, and in the air we breathe. Many physical changes take place during the water cycle and energy transfer also occurs.

Below is the diagram of the water cycle.

- 11.1 Briefly explain the term *hydrosphere*. (1)
- 11.2 Write down the name of the process labelled:
- 11.2.1 **A** (1)
 - 11.2.2 **B** (1)
 - 11.2.3 **C** (1)
- 11.3 Explain how the atmosphere and hydrosphere interacts. (2)
- 11.4 The water cycle takes place in a closed system, which means that the total amount of water on earth remains constant. Give THREE possible reasons why so many countries in the world today, including South Africa, are facing a shortage of water. (6)

Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners Cheryll M. Adams, Alicia Cotabish, Debbie Dailey, 2021-09-23 A Teacher's Guide to Using the Next Generation Science Standards With Gifted and Advanced Learners provides teachers and administrators with practical examples of ways to build comprehensive coherent and rigorous science learning experiences for gifted and advanced students from kindergarten to high school. It provides an array of examples across the four domains of science: physical sciences, Earth and space sciences, life sciences, and engineering technology and applications of science. Each learning experience indicates the performance expectation addressed and includes a sequence of activities, implementation examples, connections to the CCSS Math and CCSS ELA, and formative assessments. Chapters on specific instructional and management strategies, assessment, and professional development suggestions for implementing the standards within the classroom will be helpful for both teachers and administrators.

Exemplars of Curriculum Theory Arthur K. Ellis, 2014-01-09 This book crosses the divide between theoreticians and practitioners by demonstrating how curriculum theories and models are applied in classrooms today. It ties together broad educational theories such as progressivism, essentialism, perennialism, etc. Curriculum models characterized as learner-centered, society-centered, or knowledge-centered and exemplars of curriculum theories and models such as Reggio Emilia, Core Knowledge, the International Baccalaureate, etc.

Rubrics for Assessing Student Achievement in Science Grades K-12 Hays B. Lantz, 2004-02-06 I recommend Rubrics for Assessing Student Achievement in Science Grades K-12 to any school district that is moving toward a standards-based curriculum. It will serve as a valuable tool for assessing student learning. Grace Cisek, Director of Mathematics and Science Curriculum, Chester County Intermediate Unit PA. At last, science educators will now be able to use custom-made rubrics to assess and evaluate student performance in the standards-based science classroom. Combining clarity, detail, utility, and practicality, veteran educator and author Hays B. Lantz Jr. offers the most complete collection of evaluation and assessment tools in science education available today. This concise handbook was designed to improve the quality and uniformity of evaluation as well as assessment of student progress. Written in language appropriate for both students and teachers in grades K-12, there are over 100 ready-to-use performance lists, holistic rubrics, and analytic rubrics that contain clear descriptions of the particular traits and qualities desired in student products and performances. Key features distinguishing this book include: Scoring tools for a wide range of products and performances found in effective science classrooms and programs; Assessment tools that differentiate by learning levels, providing a scaffolding of increasingly complex expectations across the grades; Years of extensive field testing of the evaluative criteria. Rubrics for Assessing Student Achievement in Science Grades K-12 is a valuable resource that will help to measure what students know and are able to do in the science classroom. It will yield more consistent and defensible judgments, more precise feedback, and sharper student learning and performance.

Inclusive Texts in Elementary Classrooms Amy J.

Heineke, Aimee Papola-Ellis, 2022 Learn how to put children's diverse and storied experiences at the center of the curriculum. Schools are more diverse than ever before but the texts and materials that typify classroom curricula continue to prioritize so-called mainstream stories and perspectives. These canonical texts often exclude the nuanced identities and rich lived experiences of the very children sitting in today's classrooms. But kids thrive when they see themselves in texts and learn about the world around them by connecting with the experiences of others. Based on the authors' work with elementary school teachers over the last decade, this resource offers strategies for moving away from canonical texts. The authors present a four-part framework for selecting, using, and engaging students with texts that promote children's identity development, literacy engagement, and comprehension and learning across the content areas. The practical text provides guidance for setting learning goals that align with relevant standards and curricular directives, as well as classroom examples, teaching strategies, and reflective questions. **Book Features:** An actionable way for teachers to move from theory to practice using what we know about culturally relevant practice and critical literacy to create instruction that enhances children's classroom experiences and learning. An inclusive and intersectional approach that supports all teachers in enhancing their classroom libraries and curricular resources for the benefit of all students. Specific ideas for texts and authors, as well as more generalizable themes and ideas that will guide future exploration and use of texts in classrooms. Tangible strategies and rich classroom examples from 20 expert teachers spanning diverse elementary school settings. Reflective questions to help practitioners personalize the content to their own contexts.

Conceptual Structures for Discovering Knowledge Simon Andrews, Simon Polovina, Richard Hill, Babak Akhgar, 2011-07-18 This book constitutes the proceedings of the 19th International Conference on Conceptual Structures ICCS 2011 held in Derby, UK, in July 2011. The 18 full papers and 4 short papers presented together with 12 workshop papers were carefully reviewed and selected for inclusion in the book. The volume also contains 3 invited talks. ICCS focuses on the useful representation and analysis of conceptual knowledge with research and business applications. It advances the theory and practice in connecting the user's conceptual approach to problem solving with the formal structures that computer applications need to bring their productivity to bear. Conceptual structures (CS) represent a family of approaches that builds on the successes of artificial intelligence, business intelligence, computational linguistics, conceptual modelling, information and Web technologies, user modelling, and knowledge management. Two of the workshops contained in this volume cover CS and knowledge discovery in under-traversed domains and in task-specific information retrieval. The third addresses CD in learning, teaching, and assessment.
