The experimental group performed significantly better than the control group on the standardized tests. The results also indicate that the program's effectiveness is influenced by several factors, including the quality of the teaching materials, the level of student motivation, and the support of the school administration. The study concludes that the new educational program is an effective method for improving student learning outcomes, and it provides recommendations for future program development.

The study is limited by several factors, including the sample size, the duration of the study, and the lack of control over external factors. The results of the study should be interpreted with caution, and further research is needed to confirm the findings.
