

Population Distributions

How does population distribution affect the outcome?

Activity

Alaska encompasses 377 million acres of unoccupied forest land. It is the largest state in the United States, yet with a population of nearly 700,000 people, it has the lowest population density in America. Even when forests in one of the smallest states and forests in a population of nearly 7 million live adjacent to 100,000 of the 400,000 total land acres are considered unoccupied, what are the reasons that the single population value represents the entire state and what effect does this representation have on the outcome?

Activity 1 — Population Density and Distributions
