WORKSHEET

Global Population Distribution

Global population distribution shows where people live and how they live. It is the result of many factors.

Population Density

- The world's population is unevenly distributed across the globe.
- The majority of people live in densely populated areas.
- The majority of people live in areas where density is higher than the world average.
- The majority of people live in areas where density is lower than the world average.
- The majority of people live in areas where density is the same as the world average.

Population Density

Population Density and Distribution

Some areas of the world are densely populated (crowded), while others are sparsely populated (empty). This is due to many factors.

Factors influencing where people live:

• Climate: Some people live in areas where the climate is favourable to human life. Others live in areas where the climate is unfavourable.

Population Density

Population density is the number of people living in a given area. It is measured in people per square kilometre.

Population density is not the same everywhere. It is higher in some areas and lower in others.
