COURSE OVERVIEW

ISU Catalogue description: "Individual human behavior in social contexts. Emphasis on social judgments and decisions, attitudes, perceptions of others, social influence, aggression, stereotypes, and helping."

Course goals: By the end of this course, you should:

- Have an increased knowledge base regarding social psychology, as well as an enhanced ability to examine social behavior with a critical eye
- Be able to explain how psychologists do what they do, and why they do it that way
- Be able to recognize and apply various social psychological principles to your everyday life

Required textbook: *Social Psychology* (2007, 7th edition) by Kassir, Fein, & Markus.

Course format: This course will be delivered in an online format.

Course materials: Course notes, audio lectures, and other materials will be available on Blackboard Learn.

STUDENT EVALUATION

Journal discussion board postings: Because this is an online-only course, there are no chances for face-to-face contact, which eliminates one of the most important aspects of a course – the opportunity to ask questions and to participate in discussion. To foster a "classroom" environment, each student will be required to contribute to the class via discussion boards. Students in previous classes have really enjoyed this assignment.

Students will be required to post a journal on the discussion boards of Blackboard Learn. Each journal post will count for 8 points. Please see the "Social Psychology Journal" file on Blackboard Learn for a more detailed description of what is expected, as well as several example entries. We encourage you to check the discussion boards often.

Journal responses: Students are required to make 3 responses/comments on journals posted by classmates. Each comment you make will count for 1 point. Comments must be thoughtful – something like, "Oh yeah, dude, that's cool!" will not count. You could post something about a similar or different experience, or how you agree with the original poster and why, or questions you might have for the original poster. Comments are due before the next journal is due.

Reconnecting
Joseph J. Luciani, 2009-04-20

There's no doubt about it: every conflict in every relationship involves two people with two different perceptions, and every solution requires two partners to arrive at a single shared perception. You can't repair a damaged relationship by yourself, and you can't change your partner into someone else. Does that mean the situation is hopeless? Absolutely not. In *Reconnecting*, Dr. Joseph Luciani, the celebrated author of the renowned *Self-Coaching* series, introduces a proven practical method you can follow to encourage your less-than-cooperative partner to join you in a meaningful healing process, even if you have to take the first steps on your own. Dr. Luciani begins by helping you evaluate your own level of insecurity and using his Self-Talk technique to do something to improve it. He shows you how to use Self-Talk to become a catalyst for change in your relationship by eliminating your contribution to the problem. You'll identify your own personality patterns and use Self-Talk to let go of personal baggage, stop listening to what hurts you, and see the problem as a whole. Next, you'll learn how to apply Catalytic Self-Coaching to your relationship. You'll find out what it means to create a relationship vacuum, and you'll start working with Self Self Us Portraits. You'll also discover how to risk trusting each other and to begin coaching each other away from destructive habits and toward a more truthful and loving relationship. This eye-opening and life-changing guide offers constant support on your journey toward a more loving and rewarding relationship.

You'll find plenty of prescriptive advice to help you make sense of your own personality patterns and cope with the anxiety and depression that often accompany difficult relationships. Dr. Luciani's success stories of patients who have changed their lives will help you realize that you're not alone and there is hope. Complete with a valuable discussion of the essential principles of successful relationships and how to put them into action every day, *Reconnecting* is the resource you need to break free of destructive habits and create a new, more secure relationship that brings you the companionship, commitment, trust, and true love you need.

Beginning JavaScript Paul Wilton, Jeremy McPeak, 2007-05-23. JavaScript is a scripting language that enables you to enhance static web applications by providing dynamic, personalized, and interactive content. This improves the experience of visitors to your site and makes it more likely that they will visit again. You must have seen the flashy drop-down menus, moving text, and changing content that are now widespread on web sites; they are enabled through JavaScript. Supported by all the major browsers, JavaScript is the language of choice on the Web. It can even be used outside web applications to automate administrative tasks, for example. This book aims to teach you all you need to know to start experimenting with JavaScript: what it is, how it works, and what you can do with it. Starting from the basic syntax, you'll move on to learn how to create powerful web applications. Don't worry if you've never programmed before; this book will teach you all you need to know, step by step. You'll find that JavaScript can be a great introduction to the world of programming, with the knowledge and understanding that you'll gain from this book, you'll be able to move on to learn newer and more advanced technologies in the world of computing. In order to get the most out of this book, you'll need to have an understanding of HTML and how to create a static web page. You don't need to have any programming experience. This book will also suit you if you have some programming experience already and would like to turn your hand to web programming. You will know a fair amount about computing concepts but maybe not as much about web technologies. Alternatively, you may have a design background and know relatively little about the Web and computing concepts. For you, JavaScript will be a cheap and relatively easy introduction to the world of programming and web application development. Whoever you are, we hope that this book lives up to your expectations. You'll begin by looking at exactly what JavaScript is and taking your first steps with the underlying language and syntax. You'll learn all the fundamental programming concepts, including data and data types and structuring your code to make decisions in your programs or to loop over the same piece of code many times. Once you're comfortable with the basics, you'll move on to one of the key ideas in JavaScript: the object. You'll learn how to take advantage of the objects that are native to the JavaScript language, such as dates and strings, and find out how these objects enable you to manage complex data and simplify your

programs Next you'll see how you can use JavaScript to manipulate objects made available to you in the browser such as forms windows and other controls Using this knowledge you can start to create truly professional looking applications that enable you to interact with the user Long pieces of code are very hard to get right every time even for the experienced programmer and JavaScript code is no exception You look at common syntax and logical errors how you can spot them and how to use the Microsoft Script Debugger to aid you with this task Also you need to examine how to handle the errors that slip through the net and ensure that these do not detract from the experience of the end user of your application From here you'll move on to more advanced topics such as using cookies and jazzing up your web pages with dynamic HTML and XML Finally you'll be looking at a relatively new and exciting technology remote scripting This allows your JavaScript in a HTML page to communicate directly with a server and useful for say looking up information on a database sitting on your server If you have the Google toolbar you'll have seen something like this in action already When you type a search word in the Google toolbar it comes up with suggestions which it ge
