Materials Science In Construction: An Introduction

Arshad Ahmed, John Sturges, 2014-11-20 Materials Science in Construction explains the science behind the properties and behaviour of construction's most fundamental materials: metals, cement and concrete, polymers, timber, bricks and blocks, glass and plaster. In particular, the critical factors affecting in situ materials are examined, such as deterioration and the behaviour and durability of materials under performance. An accessible, easy-to-follow approach makes this book ideal for all diploma and undergraduate students on construction-related courses taking a module in construction materials.

Overview of Roofing Materials for Forest Service Facilities Dick Karsky, 2000

The Commercial and Industrial Roof Repair Field

Guide J. L. Foster, 2014-02 This field guide explains the common processes and procedures for tracking and discovering some of the most complicated roof-related and non-roof-related problems. Whether they are roof-related or not, fail-safe procedures that increase accuracy while eliminating guesswork and negative process help the investigator focus on the structured factors of the roof leak. The guide may seem complicated but is detailed in a generic fashion so the reader can identify all facets of the requirements. John wrote this book as he would train people on the roof and suggests you read it at home first and then take it on the roof. Once this book has been understood, you will continue forward following the common rules and adapting will the materials and types of roofs you have on hand.

Energy Assessments for Industrial

Complexes Alexander Spivak, Ashok Kumar, Matthew Franchetti, 2013-04-08 This e-book discusses methods that businesses may employ to reduce energy costs related to managing industrial buildings through environmentally sustainable methods. There are several chapters covering various aspects of energy assessments and each chapter is linked to case histories that are given in the appendix. The chapters cover energy-efficient methods for managing lighting, insulation, machines, air conditioning and much more. Information needed during the assessment process is also supplemented in tables. Readers who wish to gain a better understanding of the many ways to reduce energy consumption can benefit from this book.

Good School Maintenance Illinois Association of School Boards, Springfield, 1996 This manual published by the Illinois Association of School Boards was designed to be used as a teaching tool and reference source for overseeing effective school maintenance. Section 1 describes the basics of good school maintenance, including managing the program using computers, controlling energy costs, ensuring safe practices, designing buildings for efficient maintenance and being informed about environmental issues. Section 2 details guidelines for operating cleaning and general building services such as custodial operations, area cleaning programs and equipment and supplies. A custodian's glossary is included. The third section provides guidelines for building maintenance, specifically caring for the exterior and roof. Procedures for maintaining school grounds are detailed in the fourth section. The fifth section describes the maintenance of mechanical equipment, including heating and air conditioning systems, sanitary systems and fixtures, sewage treatment plants and electrical systems.
