*Nutrition and Metabolism in Patient Care* John M. Kinney, 1988

*Clinical Nutrition of the Essential Trace Elements and Minerals* John D. Bogden, Leslie M. Klevay, 2000-07-26 The Nutrition and Health series of books have as an overriding mission to provide health professionals with texts that are considered essential because each includes

- 1 a synthesis of the state of the science
- 2 timely in depth reviews by the leading researchers in their respective fields
- 3 extensive up to date fully annotated reference lists
- 4 a detailed index
- 5 relevant tables and figures
- 6 identification of paradigm shifts and the consequences
- 7 virtually no overlap of information between chapters but targeted inter chapter referrals
- 8 suggestions of areas for future research and
- 9 balanced data driven answers to patient questions which are based upon the totality of evidence rather than the findings of any single study

The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate The editors whose trainings are both research and practice oriented have the opportunity to develop a primary objective for their book define the scope and focus and then invite the leading authorities from around the world to be part of their initiative The authors are encouraged to provide an overview of the field discuss their own research and relate the research findings to potential human health consequences

**Public Enemy Number 1--stress** Herman Todorov,Robert Nadler,Igor N.

Todorov,2000 It can slowly drain the life force from your body over time Or kill swiftly without warning But you will never find it on a medical chart or see it listed on a death certificate It is called stress It exacts a tremendous toll on our lives It saps our strength robs our youth and makes us old before our time We encounter it day in and day out yet do little if anything about it It is no wonder In today's pressure cooker society the average lunch hour lasts about 11 minutes Dinner is often consumed in less than 6 minutes usually seated in front of the television The average workday can last 10 hours or more We seem to be living in a society where there is virtually no time for quality time Strictly speaking stress itself is not among the direct causes of ageing yet it plays an extremely important role in the ageing process It is a powerful force that serves as a catalyst in every known mechanism that causes us to age Readers might be surprised to find out that this book has as much to do with ageing life extension and specific measures we can take to postpone the inevitable as it does with stress The fact is that stress and ageing are inextricably bound together
