the B2C Solution Architect exam and Salesforce certification with practical scenarios following Salesforce best practices

Book Description There's a huge demand on the market for Salesforce professionals who can create a single view of the customer across the Salesforce Customer 360 platform and leverage data into actionable insights. With *Salesforce B2C Solution Architect's Handbook*, you'll gain a deeper understanding of the integration options and products that help you deliver value for organizations. While this book will help you prepare for the B2C Solution Architect exam, its true value lies in setting you up for success afterwards. The first few chapters will help you develop a solid understanding of the capabilities of each component in the Customer 360 ecosystem: their data models and governance. As you progress, you'll explore the role of a B2C solution architect in planning critical requirements and implementation sequences to avoid costly reworks and unnecessary delays. You'll learn about the available options for integrating products with the Salesforce ecosystem and demonstrate best practices for data modeling across Salesforce products and beyond. Once you've mastered the core knowledge, you'll also learn about tools, techniques, and certification scenarios in preparation for the B2C Solution Architect exam. By the end of this book, you'll have the skills to design scalable, secure, and future-proof solutions supporting critical business demands.

What you will learn

- Explore key Customer 360 products and their integration options.
- Choose the optimum integration architecture to unify data and experiences.
- Architect a single view of the customer to support service, marketing, and commerce.
- Plan for critical requirements, design decisions, and implementation sequences to avoid sub-optimal solutions.
- Integrate Customer 360 solutions into a single source of truth, solution such as a master data model.
- Support business needs that require functionality from more than one component by orchestrating data and user flows.
