Holography—A Critical Debate within Contemporary Visual Culture Andrew Pepper,2020-12-02 Artists have been exploring the spatial conceptual and three dimensional qualities of holography for over fifty years Why then is there so little sustained critical pressure placed on this process methodology and mode of visualisation which underpins the developing practice In 1994 pioneering British artist Margaret Benyon in her doctoral thesis posed the question How is Holography Art and offered a range of answers by applying critical pressure to her considerable work in the field Over 25 years later we have used Benyon's investigation as an invitation to ask more questions This Special Issue in Arts brings together artists working with holography as well as curators and long term expert observers with an interest in the medium

to open up a more comprehensive discussion They have reflected on the development of their work and its place within a cultural and critical framework The curators and observers have employed a wider lens from their standpoints outside the field but this is located firmly within current cultural discussions There are more questions and certainly a need to increase the critical pressure around why holography could be one of the most significant ways of seeing and representing worlds and ideas today We are surrounded by terrible art painting sculpture print photography performance digital moving image and holography has undoubtedly contributed to the visual flotsam clogging our vision This publication aims to identify the importance of critical conversation and the place holography holds within our current and complex media landscape

Reconstructing Response to Student Writing Dan Melzer, 2023-08-07 In *Reconstructing Response to Student Writing* Dan Melzer makes the argument that writing instructors should shift the construct so that peer response and student self assessment are more central than teacher response Presenting the results of a national study of teacher and peer response and student self assessment at institutions of higher education across the United States Melzer analyzes teacher and peer response to over 1 000 pieces of student writing as well as 128 student portfolio reflection essays He draws on his analysis and on a comprehensive review of the literature on response to introduce a constructivist heuristic for response aimed at both composition instructors and instructors across disciplines Melzer argues that teachers and researchers should focus less on teacher response to individual pieces of student writing and more on engaging in dialogue with student self assessment and peer response focusing on growth and transfer rather than products and grades *Reconstructing Response to Student Writing* especially when taken together with Melzer's previous book *Assignments across the Curriculum* provides a comprehensive and large scale view of college writing and responding across the curriculum in the United States

Lawyers, academics, and law students live and work in a textual world where the written word is law and law is interpreted largely within written and printed discourse. Is it possible, however, to understand and learn law differently? Could modes of knowing, feeling, memory, and expectation commonly present in the Arts enable a deeper understanding of law's discourse and practice? If so, how might that work for students, lawyers, and academics in the classroom and in continuing professional development? Bringing together scholars, legal practitioners internationally from the fields of legal education, legal theory, theatre, architecture, visual and movement arts, this book is evidence of how the Arts can powerfully revitalize the theory and practice of legal education. Through discussion of theory and practice in the humanities and Arts, linked to practical examples of radical interventions, the chapters reveal how the Arts can transform educational practice and our view of its place in legal practice. Available in enhanced electronic format, the book complements *The Moral Imagination* and *The Legal Life*, also published by Ashgate.
