Up and Running with AutoCAD 2011 Elliot J. Gindis, 2010-09-27 Up and Running with AutoCAD 2011 provides an introduction to the fundamental concepts of AutoCAD. The text strips away complexities both real and perceived and reduces AutoCAD to easy to understand basic concepts. It teaches only what is essential to operating AutoCAD first thereby immediately building student confidence. All basic commands are documented step by step meaning that what the student needs to type in and how AutoCAD responds is all spelled out in discrete and clear steps with screen shots added as needed. Using the author's extensive multi industry knowledge of what is and is not important and widely used in practice the material is presented by immediately immersing the student in practical critically essential knowledge with no padding of text or filler material. All concepts are explained first in theory and only then is AutoCAD introduced and the actual button pushing discussed. This is one of the key concepts in having students understand exactly what it is they are doing and why before they do it. Strips away complexities both real and perceived and reduces AutoCAD to easy to understand basic concepts. Explains why something is done not just how the theory behind each concept or command is discussed prior to engaging AutoCAD so the student has a clear idea of what they are attempting to do. All basic commands are documented step by step what the student types in and how AutoCAD responds is spelled out in discrete and clear steps with numerous screen shots. Extensive supporting graphics screen shots and a summary with a self test section and topic specific drawing exercises are included at the end of each chapter. Additional practice is gained through projects that the students work on as they progress through the chapters. Also available in a comprehensive volume that includes coverage of 3D drawing and modeling in AutoCad ISBN for comprehensive volume is 978 0 12 375717 3 **CORP 2011 Proceedings/Tagungsband**

Manfred Schrenk, Vasily V. Popovich, Peter Zeile, **Masterliness in the Teaching Profession** Linda La Velle, 2016-03-22 This collection presents an international perspective on issues of training and accreditation at the Master's level of course provision in the initial and continuing professional development of teachers coining the phrase masterliness in education. It provides a comparative background to inform the debate about the level at which teachers knowledge bases make them most effective in terms of both pedagogic expertise and pupils outcomes. The book examines and illustrates the relationship between master's level education and professionalism through the lenses of reflective evaluation narrative inquiry and critique. Discussion of issues of professionalism and acculturation of teachers exemplifies the tension that arises in modern educational systems across the world between teacher accountability and teacher autonomy and argues that masterliness in education can only be acquired through the professional freedom afforded by teacher autonomy within empowering frameworks of professional development. Several chapters deliberate the relationship between the roles of schools and higher education institutions in both initial and continuing teacher education at master's level providing argument and evidence to show that this partnership is crucial to the effectiveness of the professional development that supports improved outcomes.

for learners This book demonstrates that masterliness in education an aspiration of initial and continuing teacher education internationally is a state of advanced professional critical thinking linked to action and informed by research and evidence Through the exercise of this criticality teacher empowerment expertise and autonomy increase as masterliness develops There is considerable convergence in the provision of these elements of Masters level courses internationally and this enables the debate to highlight good practice and to exemplify those essential characteristics of masterliness in teaching that lead to the continued improvement of learning in the world s schools This book was originally published as a special issue of Journal of Education for Teaching Teaching, Learning and Investigating Pragmatics Sara Gesuato, Winnie Cheng, 2015-09-18 This volume presents a collection of research papers investigating how to foster the learning and teaching of pragmatic phenomena as well as how to administer tests that assess pragmatic competence in second foreign language education with regards to several target languages The topics investigated include speech acts computer mediated communication conversation analysis pragmatic intercultural and emotional competence native and non native performance data collection and instructional methods needs analysis and syllabus design and materials development The contributions will be of particular interest to linguists language learners and teachers teacher trainers and communication experts
