is only during the last two decades that they are in the process of becoming an underclass The underclass debate has so far been framed in ideological terms This book's main aim is to turn this ideological controversy into an analytic project under what socioeconomic conditions is a social group's situation sufficiently different from earlier times Is its exclusion from society sufficiently rigid that underclass is the concept that best describes its condition *Industrial Finishing and Surface Coatings*, 1961

The Matter of Facts Gareth Leng, Rhodri Ivor Leng, 2020-03-18 How biases the desire for a good narrative reliance on citation metrics and other problems undermine confidence in modern science Modern science is built on experimental evidence yet scientists are often very selective in deciding what evidence to use and tend to disagree about how to interpret it In *The Matter of Facts* Gareth and Rhodri Leng explore how scientists produce and use evidence They do so to contextualize an array of problems confronting modern science that have raised concerns about its reliability the widespread use of inappropriate statistical tests a shortage of replication studies and a bias in both publishing and citing positive results Before these problems can be addressed meaningfully the authors argue we must understand what makes science work and what leads it astray The myth of science is that scientists constantly challenge their own thinking But in reality all scientists are in the business of persuading other scientists of the importance of their own ideas and they do so by combining reason with rhetoric Often they look for evidence that will support their ideas not for evidence that might contradict them often they present evidence in a way that makes it appear to be supportive and often they ignore inconvenient evidence In a series of essays focusing on controversies disputes and discoveries the authors vividly portray science as a human activity driven by passion as well as by reason By analyzing the fluidity of scientific concepts and the dynamic and unpredictable development of scientific fields the authors paint a picture of modern science and the pressures it faces
