Transformation Literacy Petra Künkel, Kristin Vala Ragnarsdottir, 2022-03-02 This open access book brings science and practice together and inspires a global movement towards co creating regenerative civilizations that work for 100% of humanity and the Earth as a whole With its conceptual foundation of the concept of transformation literacy it enhances the knowledge and capacity of decision makers change agents and institutional actors to steward transformations effectively across institutions societal sectors and nations Humanity is at crossroads Resource depletion and exponential emissions that not only cause climate change but endanger the health of people and planet call for a decisive turnaround of human civilization A new and transformative paradigm is emerging that advocates for regenerative civilizations in which a narrative of systemic health as much as individual and collective vitality guide the interaction of socio economic ecological systems

Truly transformative change must go far beyond technical solutions and instead envision what can be termed a new operating system that helps humankind to live well within the planetary boundaries and partner with life's evolutionary processes. This requires transformations at three different levels: Mindsets that reconnect with a worldview in which human agency acknowledges its co-evolutionary pathways with each other and the Earth; Political, social and economic systems that are regenerative and foster the care-taking for Earth life support systems; Competencies to design and implement effective large-scale transformative change processes at multiple levels with multiple stakeholders. This book provides key ingredients for enhancing transformation literacy from various perspectives around the globe. It connects the emerging practice of stewarding transformative change across business, government institutions and civil society actors with the most promising scientific models and concepts that underpin human action to shape the future collectively in accordance with planetary needs.

Gluten-Related Disorders Mohammad Rostami-Nejad, 2021-09-19. Gluten-related disorders are prevalent worldwide, especially in developing countries. These diseases have similar clinical manifestations. Although they are characterized by a specific pathophysiological response to ingestion of gluten, differential diagnosis of these disorders is very challenging. Failure to diagnose and treat these disorders at an early stage can lead to irreparable health and cost damages. *Gluten-Related Disorders: Diagnostic Approaches, Treatment Pathways and Future Perspectives* solves this problem by reporting up-to-date scientific findings that allow for faster, more accurate diagnosis of gluten-related disorders as well as guidance on treatment options. By identifying the distinctive features of each of the gluten-related disorders, the chapters lead readers to optimal diagnosis and treatment options as well as better research designs for future research studies on the pathogenesis of these disorders. This reference, provided by experts in the field, is perfect for researchers, scientists and medical practitioners who are involved in addressing gluten-related disorders. Provides a comprehensive overview on all aspects of gluten-related disorders, incorporating many up-to-date scientific findings. Highlights the differences and overlaps in clinical presentations of gluten-related disorders in order to aid differential diagnosis. Presents the current understanding of the pathogenesis of gluten-related disorders which can be used to inform future research endeavors.

Reconstituting the Curriculum M. R. Islam, Gary M. Zatzman, Jaan S. Islam, 2013-11-13 Based on groundbreaking new ideas this treatise signals a return to a rebuilding and reshaping of the curriculum as the primary tool for education This book presents a new definition of curriculum and what it should consist of with a view toward creating a more ethical educated and thinking person Rather than treating students as products for society this approach returns to a view of the curriculum as a tool for educating students to reason through problems be bold in creating new solutions and contribute to a more vibrant just world The university curriculum introduced in the post Renaissance era dominated by doctrinal philosophy is based on learning or skill development suitable for creating a learned society that would eventually serve the establishment This curriculum has been promoted as the only form suitable for the modern education system It has introduced a tremendous amount of tangible advancement in all fields of the structured education system These tangible gains are often promoted as knowledge This has created confusion between education acquiring knowledge and learning training or skill development This book seeks to clarify the difference between these two divergent views of education It has been shown that the current curriculum is not conducive to increasing a student s knowledge because it is based on consolidating preconceived ideas that have been either passed on from previous generations or gained through personal experience In most cases this mode of cognition will not create a pathway for gaining knowledge that brings one closer to discovery The term education on the other hand is always meant to be a process of bringing forth one s inherent qualities and unique traits necessary and sufficient for increasing one s knowledge
