Safety Science Research Jean-Christophe Le Coze, 2019-08-13

Safety Science Research Evolution Challenges and New Directions provides a unique perspective into the latest developments of safety science by putting together for the first time a new generation of authors with some of the pioneers of the field. Forty years ago research traditions were developed including among others high reliability organisations, cognitive system engineering or safety regulations. In a fast changing world the new generation introduces in this book new disciplinary insights, addresses contemporary empirical issues, develops new concepts and models while remaining critical of safety research practical ambitions. Their ideas are then reflected and discussed by some of the pioneers of safety science. Features: Allows the reader to discover how contemporary safety issues are currently framed by a new generation of researchers brought together for the first time. Includes an introduction and guide to the development of safety science over the last four decades. Features an extraordinary collection of expert contributors including pioneers of safety research reflecting the evolution of the discipline and offering insightful commentary on the current and future state of the field. Serves as an invaluable reference and guide for safety professionals and students from any established disciplines such as sociology, engineering, psychology, political science or management as well as dedicated safety programmes. Some figures in the eBook are in colour.

Safety in Medication Use Mary Patricia Tully, Bryony Dean Franklin, 2015-08-18. An estimated 1 in 20 patients are admitted to the hospital due to problems with their medication and 1 in 100 hospitalized patients are harmed due to medication errors during their stay. The prescribing of medications is the most common health care intervention and medication safety is relevant to all health care professionals and patients in all.

Human Factors and Ergonomics: Syllabus for Indian Universities Vivek Kant, Prathamesh Bachche, Rammohan Maikala, 2024-05-06. As India moves towards the Vision 2047 in a quest for a better future, there is a growing need for the design of technology and infrastructure to enable well-being, safety and productivity for Indians. Human Factors and Ergonomics is one discipline that supports the well-being of people in terms of design, maintenance, management, regulation and governance of technology. Due to the lack of disciplinary programs that address the totality of the discipline, there is a need for capacity building in the academic sector for training the next generation of practitioners. This sample syllabus, while covering the breadth of the discipline, also provides a foundation for Indian universities to fulfil the requirements of Human Factors and Ergonomics. This syllabus can be creatively adapted to suit specific master's programs in science, engineering, technology and design. This syllabus provides a basis for a holistic academic program that supports the next generation of learners in India.
