The Practical Bioinformatician Limsoon Wong,2004-05-24

Computer scientists have increasingly been enlisted as bioinformaticians to assist molecular biologists in their research. This book is a practical introduction to bioinformatics for these computer scientists. The chapters are in depth discussions by expert bioinformaticians on both general techniques and specific approaches to a range of selected bioinformatics problems. The book is organized into clusters of chapters on the following topics: Overview of modern molecular biology and a broad spectrum of techniques from computer science; data mining; machine learning; mathematical modeling; sequence alignment; data integration; workflow development etc. In depth discussion of computational recognition of functional and regulatory sites in DNA sequences. Incisive discussion of computational prediction of secondary structure of RNA sequences. Overview of computational prediction of protein cellular localization and selected discussions of inference of protein function. Overview of methods for discovering protein protein interactions. Detailed discussion of approaches to gene expression analysis for the diagnosis of diseases, the treatment of diseases and the understanding of gene functions. Case studies on analysis of phylogenies; functional annotation of proteins; construction of purpose built integrated biological databases and development of workflows underlying the large scale effort gene discovery.

Towards Water Circular Economy Ankit Agarwal, Basant Yadav, Manish Nema, Mukesh Sharma, Arun Kumar, 2024-05-11. Responsible water management and circular economy aims to establish a common understanding of circular economy principles and resilience in the water sector and to support countries in the implementing those principles. It is essential for water security to deal with the effect of climate change. It can be achieved through smart water management; use of non conventional water resources; rejuvenation of natural water systems using advance tools and techniques and adaptation strategies. It will help in improving the water availability in terms of quantity as well as quality and human health. Smart water governance and educating society can also play an important role in achieveing the Sustainable Development Goal SDG 6 Water for all.
