Practical Guide to Antimicrobial Active Packaging Rafael Gavara, 2015-10-13 Antimicrobial packaging systems are those that beneficially interact with the food or with the surrounding environment inhibiting microorganism growth or reducing their counts to improve the quality and extend the shelf life of industrially produced foods They have undoubtedly become a fully accepted alternative to the direct addition of preservatives to foods with excellent future prospects This book will help develop a working knowledge and understanding of antimicrobial packaging it includes a description of the antimicrobial agents most commonly used and their mechanisms of action the manufacturing methods available to fabricate the active system the critical parameters to make an effective product and the tools to optimise them and the various in vitro and in vivo methods for measuring the goodness of the antimicrobial system for validation purposes The reader will develop the ability to understand why a specific agent is selected for a particular food product or why a specific polymeric material

and manufacturing technology are chosen The reader will also become familiar with the different procedures for improving the activity of the packaging solution that is being developed and ways of testing its efficacy This will accelerate the formulation of the active packaging concept reducing development time with respect to the trial and error processes common in many literature reports Finally it will help to identify the best and most cost effective solutions This volume is intended to be a practical guide to antimicrobial packaging and a quick reference for students and researchers from both academia and industry

Community Series in Antimicrobial Peptides: Molecular Design, Structure Function Relationship and Biosynthesis Optimization Jianhua Wang,Rustam Aminov,Octavio Luiz Franco,Cesar de la Fuente-Nunez,2023-02-20

Pharmacological Actions of Drugs in the Brain: Exploring the Intricacies and Potential Therapeutic Applications Christina Dalla,Giuseppe Di Giovanni,Tanya Calvey,Nouria Lakhdar-Ghazal,2024-09-25 The study of pharmacological actions of drugs in the brain is a field that constantly uncovers new insights into the mechanisms of action behind various substances This proposal aims to explore into the intriguing topics of psychedelics cannabinoids classical and novel antidepressants anxiolytic treatments and substances commonly associated with neuropsychiatric disorders such as alcohol ketamine and opiates The ultimate goal is to unravel their neurological impacts shed light on potential therapeutic applications and explore their relationship with brain disorders while also investigating the influence of sex gender on drug response Biological differences between sexes can influence how medications are metabolized and processed in the body Understanding these relationships and considering hormonal factors is crucial for optimizing treatment outcomes and tailoring medication regimens to individual needs
