Over 120 sea level experts from around the world attended this workshop from a range of different disciplines. The main aims of the workshop were to: 1. Evaluate the current state of knowledge of sea level science; 2. Identify gaps and unresolved questions in any aspect of sea level science; and 3. Design future research to address these issues. All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones. This E-Book presents papers that came out of that workshop. Overall, these papers illustrate the multi-disciplinary nature of sea level research, cross-cutting many fields of research including oceanography, meteorology, geology, coastal morphodynamics, engineering and the social/economic aspects.
