Physical Education and Physical Culture in South Africa, 1837-1966 Francois Johannes Cleophas,2024-10-17 The interconnectedness between sport and colonialism has long been a matter of interest to sport historians Consequently a large number of scholarly works exist on physical education and physical culture history but there is no significant work on this within a South African context both nationally and at community level This book therefore provides the first historical account of physical education and physical culture in Cape Town South Africa and its surrounding areas in the Western Cape

Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee,2006-11-05 The Committee's report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14-19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools

The Quick Fix Jesse Singal,2025-10-16 An investigative journalist exposes the many holes in today's bestselling behavioral science and argues that the trendy TED Talk friendly psychological interventions that are so in vogue at the moment will never be enough to truly address social injustice and inequality With their viral TED talks bestselling books and counter intuitive remedies for complicated problems psychologists and other social scientists have become the reigning thinkers of our time Grit and power posing promised to help overcome entrenched inequalities in schools and the workplace the Army spent hundreds of millions of dollars on a positive psychology intervention geared at preventing PTSD in its combat soldiers and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments But what if much of the science underlying these blockbuster ideas is dubious or fallacious What if Americans longstanding preference for simplistic self help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded leading respected academics and the media astray In The Quick Fix Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them He begins with the California legislator who introduced self esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful superpredators in the 1990s In both cases a much touted idea had little basis in reality but had a massive impact Turning toward the explosive popularity of 21st century social psychology Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior As he shows today's popular behavioral science emphasizes repairing improving and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills Like Anand Giridharadas's Winners Take All The Quick Fix is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half baked solutions to problems that deserve more serious treatment
