1. This paper consists of six questions.
2. Answer all questions in this paper.
3. Show all formulae and substitutions in all calculations.
4. Round off your final numerical answers to a minimum of TWO decimal places.

Physical Science Memo Nov 2014 P1

D Kirk

Physical Science Memo Nov 2014 P1:

A Homology Theory for Smale Spaces Ian F. Putnam, 2014-09-29 The author develops a homology theory for Smale spaces which include the basic sets for an Axiom A diffeomorphism. It is based on two ingredients. The first is an improved version of Bowen's result that every such system is the image of a shift of finite type under a finite-to-one factor map. The second is Krieger's dimension group invariant for shifts of finite type. He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups. The existence of such a theory was proposed by Bowen in the 1970s. Government Reports Announcements, 1972
