book reports on cutting edge research and developments in manufacturing giving a special emphasis to solutions fostering automation and sustainability Topics cover manufacturing process optimization remanufacturing machines and mechanical design CAD CAM CAE materials characterization and processing measurement and predictive maintenance techniques Further topics include artificial intelligence and IoT in manufacturing robotics and cutting edge issues in Industry 4.0 5.0 Based on proceedings of the 32nd edition of the International Conference on Flexible Automation and Intelligent Manufacturing FAIM 2023 held on June 18-22 2023 in Porto Portugal this first volume of a 2 volume set provides academics and professionals with extensive technical information on trends and technologies in manufacturing yet it also discusses challenges and practice oriented experience in all the above mentioned areas

Robotic Welding, Intelligence and Automation Tzyh-Jong Tarn,Shan-Ben Chen,Changjiu Zhou,2007-08-13 Robotic welding systems have been used in different types of manufacturing They can provide several benefits in welding applications The most prominent advantages of robotic welding are precision and productivity Another benefit is that labor costs can be reduced Robotic welding also reduces risk by moving the human welder operator away from hazardous fumes and molten metal close to the welding arc The robotic welding system usually involves measuring and identifying the component to be welded positioning it in position controlling the welding parameters and documenting the produced welds However traditional robotic welding systems rely heavily upon human intervention It does not seem that the traditional robotic welding techniques by themselves can cope well with uncertainties in the welding surroundings and conditions e.g. variation of weld pool dynamics fluxion solid weld torch and etc On the other hand the advent of intelligent techniques provides us with a powerful tool for solving demanding real world problems with uncertain and unpredictable environments Therefore it is interesting to gather current trends and to provide a high quality forum for engineers and researchers working in the field of intelligent techniques for robotic welding systems This volume brings together a broad range of invited and contributed papers that describe recent progress in this field

Deep Learning for Robot Perception and Cognition Alexandros Iosifidis,Anastasios Tefas,2022-02-04 Deep Learning for Robot Perception and Cognition introduces a broad range of topics and methods in deep learning for robot perception and cognition together with end to end methodologies The book provides the conceptual and mathematical background needed for approaching a large number of robot perception and cognition tasks from an end to end learning point of view The book is suitable for students university and industry researchers and practitioners in Robotic Vision Intelligent Control Mechatronics Deep Learning Robotic Perception and Cognition tasks Presents deep learning principles and methodologies Explains the principles of applying end to end learning in robotics applications Presents how to design and train deep learning models Shows how to apply deep learning in robot vision tasks such as object recognition image classification video analysis and more Uses robotic simulation environments for training deep learning models Applies deep learning methods for different tasks ranging from planning and navigation to biosignal analysis

Optimization, Learning Algorithms and Applications Ana

I. Pereira, Florbela P. Fernandes, João P. Coelho, João P. Teixeira, Maria F. Pacheco, Paulo Alves, Rui P. Lopes, 2021-12-02 This book constitutes selected and revised papers presented at the First International Conference on Optimization Learning Algorithms and Applications OL2A 2021 held in Bragança Portugal in July 2021 Due to the COVID 19 pandemic the conference was held online The 39 full papers and 13 short papers were thoroughly reviewed and selected from 134 submissions They are organized in the topical sections on optimization theory robotics measurements with the internet of things optimization in control systems design deep learning data visualization and virtual reality health informatics data analysis trends in engineering education
