Forces of Nature Barry A. Vann, 2012-03-20 As long as the human species has existed men and women have had to contend with the unpredictable forces of nature Geographer Barry A Vann brings a unique perspective to this age old struggle in this illuminating overview of human population shifts and their precarious relationship with climate change and geography Vann takes us on a journey along the migration routes of the earliest modern humans and tells why our ancestors chose to settle down in places that can be best described as natural utopias In the religiously oriented worldview of ancient peoples such places took on a sacred aura of divine favor Similarly destructive events such as volcanic eruptions and earthquakes were interpreted as expressions of divine wrath Vann shows how the ancient texts of the Bible and the Qur'an offer glimpses of past climates that were distinctly different from the climate of our time He also discusses the rise of technology as a means of controlling the threatening features of the natural world Though technology has enabled humanity to cope with hostile climates it has also created a false sense of security Vann notes that population clusters are increasing in dangerous areas and that no technology can protect vulnerable groups from major category hurricanes tornadoes or earthquakes Finally he considers our current anxieties regarding global warming pointing out that this focus has obscured a good deal of historical and geological evidence for a return of another ice age The Forces of Nature offers a

challenging perspective on the precarious balance between fragile human communities and their often threatening environments

Language and Literacy in Refugee Families Chatwara Suwannamai Duran, 2016-11-24 This book examines the agreements and discrepancies between public understanding and assumptions about refugees and the actual beliefs and practices among the refugees themselves in a time of increasing mobility fuelled by what many call refugee crisis With a focus on language and literacy practices among recently arrived Karenni refugee families in the United States this book explores the multilingual repertoires and accumulated literacies acquired through the course of the refugees multiple movements Through the lens of transnationalism the author emphasizes that despite their numerous struggles the refugees daily and diligently use and strategize their old emerging and evolving linguistic and literacy resources to make the best of their resettlement This book will shed light on the language and literacy practices among transnational and diasporic communities minoritized or marginalized groups for researchers in these fields as well as practitioners and resettlement agencies working with refugee populations

Social Work and the Environment Michael Kim Zapf, 2009 This ground breaking new work provides a detailed and extensive comparison of how the physical environment has been conceptualized in social work and other professions and offers a new and attractive foundational metaphor for social work The author acknowledges the need for greater awareness and action regarding environmental impacts and the book promotes more comprehensive notions of responsibility identity and stewardship that lead to a dynamic metaphor of people as place as the foundation for relevant social work practice in the early 21st century Why is that a profession with a declared focus on person in environment has been so silent on the environmental crisis Mainstream social work theory has narrowed the understanding of environment to include merely the social environment but this approach is no longer sufficient for participation in multi disciplinary efforts to tackle urgent environmental issues Transformative notions of responsibility identity and stewardship have been developed on the fringes of our professional community rural remote social workers Aboriginal social workers and international and spiritual social workers They must now move to the core of the profession
