Rugby New Zeal Coaching Manual:

Dragons and All Blacks Huw Richards, 2012-04-20 The Bounce of the Century they called it A ball kicked across Cardiff Arms Park in the dying minutes of a match between two of international rugby's fiercest rivals The world's two greatest wingers waited as it bounced towards them knowing that whoever caught the ball would score and win the match for his country Dragons and All Blacks tells what happened when Wales played New Zealand in 1953 The story is written from contemporary accounts and the memories of the men who played that day including Bob Stuart and Bleddyn Williams for many of whom the match was the highlight of a career The book retells the stories of the two teams and the men who played for them and charts the events of their lives how they got to that meeting point in Cardiff in December 1953 and what has happened to them in the half century since Dragons and All Blacks examines the remarkable relationship between two countries on opposite sides of the world brought together by a mutual passion for rugby with few parallels elsewhere It shows how their rivalry has developed over a century from perhaps the greatest of all rugby matches in 1905 to the single point thriller of 2004 and looks to its future in the aftermath of the 2005 Welsh Grand Slam and Lions tour of New Zealand

The Coach's Guide to Teaching Doug Lemov, 2020-12-07

The mark of a great coach is a constant desire to learn and grow A hunger to use whatever can make them better The best selling author of Teach Like a Champion and Reading Reconsidered brings his considerable knowledge about the science of classroom teaching to the sports coaching world to create championship caliber coaches on the court and field What great classroom teachers do is relevant to coaches in profound ways After all coaches are at their core teachers Lemov knows that coaches face many of the same challenges found in the classroom so the science of learning applies equally to them

Unfortunately coaches and organizations have a mixed level of understanding of the research and study of the science of learning Sometimes coaches and organizations build their teaching on myths and platitudes more than science Sometimes there isn't any science applied at all While there are thousands of books and websites a coach can consult to better understand technical and tactical aspects of the game there is nothing for a coach to consult that explicitly examines the teaching problems on the field the court the rink and the diamond Until now Intended to offer lessons and guidance that are applicable to coaches of any sporting endeavor including everyone from parent volunteers to professional coaches and private trainers Lemov brings the powerful science of learning to the arena of sports coaching to create the next generation of championship caliber coaches
