Surviving and Thriving in Postgraduate Research Ray Cooksey, Gael McDonald, 2019-06-27 This handbook provides an in depth exploration of the entire journey of postgraduate research in the social and behavioural sciences from enrolment to its culmination in the form of a thesis dissertation or portfolio and beyond It is written in an accessible and example rich style offering practical and concrete

advice in virtually all areas It also includes references to additional resources and websites and each chapter features key recommendations for improving the postgraduate research experience The book addresses not only research related aspects e g supervisors selecting your guiding assumptions contextualising framing and configuring research reviewing literature sampling writing proposals ethics and academic integrity selecting a data gathering strategy surviving your thesis dissertation portfolio examination and publishing but also questions concerning how to integrate manage and balance the research journey in the context of the postgraduate student s broader life world e g skill development and supervisor relations effective time and project management a healthy work life balance maintaining motivation and dealing with criticism The book adopts an explicitly pluralist perspective on postgraduate research moving beyond mixed methods thinking and offers concrete examples from postgraduate students real world experiences Framed Erin Tolley,2015-12-03

Framed is a wake up call for those who think that race does not matter in Canada Combining an empirical analysis of print media with in depth interviews of elected officials former candidates political staffers and journalists this book uncovers the connections between race media coverage and politics in Canada As Erin Tolley reveals overt racism rarely occurs in the pages of Canadian newspapers but assumptions about race and diversity often influence media coverage Consequently as reporters go about selecting which political issues and events to cover who to quote and how to frame stories to make them resonate with the public they give visible minorities less prominent and more negative media coverage than their white counterparts Visible minority politicians are also more likely to be portrayed as products of their socio demographic backgrounds as uninterested in pressing policy issues and as less electorally viable The resulting news coverage Tolley argues does much to weaken Canada s commitment to a robust inclusive democracy **Doctoral Students: Attrition,**

Retention Rates, Motivation, and Financial Constraints Theodore Robert Regis,2019-10-22 For the past 40 years American college and university administrators have registered record low retention and high attrition rates Education experts and researchers have claimed the problems are embarrassing to the United States higher education institutions Based on the problems graduate school administrators are unable to graduate doctoral students at U S population growth rates Currently only 1% of Americans hold PhD degrees Compared to other industrialized countries such as Japan China and Mexico the rate is insignificant The purpose of the mixed methods case study was to investigate if there was a relationship between motivation and retention rates at the doctoral level The goal of the study was to determine if extrinsic and intrinsic motivational factors and constraints were associated with persistence in a graduate doctoral program Data were collected from 193 doctoral and graduate students for the quantitative study while 20 doctoral and graduate students participated in a qualitative study followed by a thorough semi structured interview Inductive and deductive analyses were performed transcribed and opened while axial coding provided emergent themes and sub themes The research showed a direct relationship between financial implications attrition and retention rates and motivation in doctoral level students Many

doctoral students believed the primary reason they were unable to pursue doctoral programs was based on financial hardship. Doctoral students who responded to the survey added that motivation was the second significant variable that helped them continue their studies. **Mapping actors along value chains** Stein, C., Barron, Jennie, 2017-12-12 **The Routledge**

Companion to Global Internet Histories Gerard Goggin, Mark McLelland, 2017-02-17 The Routledge Companion to Global Internet Histories brings together research on the diverse Internet histories that have evolved in different regions, language cultures and social contexts across the globe. While the Internet is now in its fifth decade, the understanding and formulation of its histories outside of an anglophone framework is still very much in its infancy. From Tunisia to Taiwan, this volume emphasizes the importance of understanding and formulating Internet histories outside of the anglophone case studies and theoretical paradigms that have thus far dominated academic scholarship on Internet history. Interdisciplinary in scope, the collection offers a variety of historical lenses on the development of the Internet as a new communication technology seen in the context of older technologies as a new form of sociality, read alongside previous technologically mediated means of relating and as a new media vehicle for the communication of content. Practising Social Work Research Rick

Csiernik, Rachel Birnbaum, 2024-06-03 Research skills are as critical to social work practitioners as skills in individual and group counselling, policy analysis and community development. Adopting strategies similar to those used in direct practice courses, this book integrates research with social work practice and in so doing promotes an understanding and appreciation of the research process. The third edition of Practising Social Work Research comprises twenty-seven case studies that illustrate different research approaches including quantitative, qualitative, single subject and mixed methods. The third edition also adopts a greater equity, diversity and inclusivity focus than the previous editions. Through the use of applied real-life examples, the authors demonstrate the processes of conceptualization, operationalization, sampling, data collection and processing and implementation. Designed to help the student and practitioner become more comfortable with research procedures, Practising Social Work Research capitalizes on the strengths that social work students bring to assessment and problem solving. Settler Shifts? Marie-Eve Beaulieu, 2023

The past few years in Canada have been marked by numerous events in the course of which Canadian Settlers were invited to reconsider their perspectives on and practices toward the Indigenous population. Public schools are one of the main institutions directly invited to reflect on and challenge their own colonial legacy and ongoing colonial structures and practices. This project aims at better understanding how a K-12 Manitoba public school and its Settler educators represent, reflect on and practice their relationship to Indigeneity and to their Anishinaabe neighbors. It thus explores how Settlerhood is constantly constructed and how this takes shape in this public school in the midst of the changing recognition of Indigenous Peoples in Canada. The research investigates structures of Settler dominations that were reproduced and disrupted in the school through changing practices. Marie-Eve Beaulieu is a Quebec-based educator of Settler ancestry. She holds a B.A. from the Université du Québec Montréal and an M.A. from the Université

de Montral and a PhD in Education from the University of Trier Germany As members of her Franco Canadian family were involved in the residential school s project of Indigenous assimilation she is interested in the transformation of Settler identity in a time of growing awareness for Indigenous oppression
