

# AUTOMATED SAFETY OBSERVATION REPORT SCANNER

## Computer Readable Safety Observation Report Cards:

### Manual vs. Scanned Reporting for 100 SOR cards:

#### ➤ Manually (between 2 – 4 hours):

Manually entering one SOR card will take approximately 2 minutes per card. Therefore, manually entering 100 cards can take anywhere between 2 and 4 hours depending on the skill set of the employee and the number of interruptions.

It is common that the person entering the card is not always the person correcting the issue. This means that the SOR card potentially goes through more hands than necessary. If it is not the same person solving the issue (for example, a safety professional vs. an administrative employee who is not in the field), he or she would have to read and grade every card again before entering.

In addition, a bilingual card makes this process more complicated. It assumes that a person is bilingual, and if he or she is not, it requires time from a 2<sup>nd</sup> employee. In short, it can be both time-consuming and prone to inaccuracies in reporting.

#### ➤ Scanned (about 15 minutes):

It takes the scanner about 2 seconds to scan a card and between 3 – 6 seconds for the computer to process each card depending on the speed of the computer. The scanner can scan and process 100 SOR cards in 5 -7 minutes depending on the speed of the computer. Once entered, the employee takes about 5 minutes to correct possible scanning errors and to copy and paste the exported data into the Excel spreadsheet. Possible scanning errors can be prevented by educating safety professionals to fill out the card properly. The spreadsheet will do all the necessary calculations in order to show the desired result.

The new card has greatly improved the time it takes to get information from the SOR card back to reporting a potential problem. Consistency is important when it comes to reporting. The safety professional is closer to the issue and therefore is also the best qualified to report a potential safety problem. The new card is easily graded by the safety professional with 5 checkmarks after he or she has corrected the issue. Redesigning the SOR card and making it readable by a computer has greatly decreased the number of errors. Most important of all, the data will be available for use in future reporting.

## **Sample Advanced Safety Assurance Observation Report:**

*Prevention of Accidents at Work* Ales Bernatik, Lucie Kocurkova, Kirsten Jørgensen, 2017-09-25 Prevention of Accidents at Work collects papers presented at the 9th International Conference on the Prevention of Accidents at Work WOS 2017 held in Prague Czech Republic on October 3-6, 2017 organized by the VSB Technical University of Ostrava. The conference on current issues within occupational safety is organized under the umbrella of Working on Safety Net (WOS Net). WOS Net is an international network of decision makers, researchers, and professionals responsible for the prevention of accidents and trauma at work. The network aims to bring accident prevention experts together in order to facilitate the exchange of experience, new findings, and best practices between different countries and sectors. WOS Net is supported by the European Agency for Safety and Health at Work (EU-OSHA). The overall theme is safety management complexity in a changing society with the motto "Do we need a holistic approach?" Underlying topics include Foundations of safety science, theories, principles, methods, and tools; Research to practice; achievements, lessons learned, and challenges; Risk management and safety culture; case studies, best practices, and further needs; Safety regulation; reasonable, practicable approach; Education and training; prerequisite for safety; Complexity and safety; multidisciplinary and inter-stakeholder views. Prevention of Accidents at Work should be valuable to researchers, policy makers, safety professionals, labor inspectors, labor administrators, and other experts in the prevention of occupational accidents.

**Scientific and Technical Aerospace Reports**, 1972 [GAO Documents](#) United States. General Accounting Office, 1979 Catalog of reports, decisions, and opinions, testimonies, and speeches [Wiley Handbook of Science and Technology for Homeland Security](#), 4 Volume Set John G. Voeller, 2010-04-12 The Wiley Handbook of Science and Technology for Homeland Security is an essential and timely collection of resources designed to support the effective communication of homeland security research across all disciplines and institutional boundaries. Truly a unique work, this 4-volume set focuses on the science behind safety, security, and recovery from both man-made and natural disasters. It has a broad scope and international focus. The Handbook educates researchers in the critical needs of the homeland security and intelligence communities and the potential contributions of their own disciplines. It emphasizes the role of fundamental science in creating novel technological solutions. Details the international dimensions of homeland security and counterterrorism research. Provides guidance on technology diffusion from the laboratory to the field. Supports cross-disciplinary dialogue in this field between operational R&D and consumer communities.
