Samsung Launches the NX11: the Latest NX System Camera and Lens Line Up

Create high quality images with the camera's easy-to-use i-Function lens

COE, Las Vegas — January 3, 2011 – Samsung Electronics Co., Ltd, a global leader in digital media and digital convergence technologies, has announced the launch of the NX11 – the latest addition to the highly successful NX family of cameras. The NX11 is an upgraded model based on the NX10, compatible with the new i-Function lens, introduced for the NX10. The NX11 will come complete with an 18-55mm i-Function lens, as well as two new i-Function lenses, a 28mm prime and a 30-90mm zoom silver color lens. The launch reinforces the company's commitment to leading innovation in the compact system camera market.

The i-Function lens puts the perfect picture at the fingertips of all photographers by providing an exceptionally easy way of controlling the camera. Because a typical camera user keeps their hand around the lens when using the camera, the new i-Function system means that photographers can naturally use their left hand to change settings through a button built into the i-Function lens, without the need to take the camera off the subject. Users can toggle between shutter speed, aperture, EV, WB, and ISO quickly and easily by simply using the i-Function button and ring on the lens, resulting in easier and quicker configuration while shooting.

The NX11 also has a focus on usability, with a change in the grip design to make shooting easier and more comfortable. Additionally, it has a lens priority mode dial, to simplify searching for the best mode for
