Using Python and R Miller addresses multiple business challenges including segmentation, brand positioning, product choice, modeling, pricing, research, finance, sports, text analytics, sentiment analysis and social network analysis. He illuminates the use of cross-sectional data, time series, spatial and spatio-temporal data. You'll learn why each problem matters, what data are relevant and how to explore the data you've identified. Miller guides you through conceptually modeling each data set with words and figures and then modeling it again with realistic code that delivers actionable insights. You'll walk through model construction, explanatory variable, subset selection and validation, mastering best practices for improving out-of-sample predictive performance. Miller employs data visualization and statistical graphics to help you explore data, present models and evaluate performance. Appendices include five complete case studies and a detailed primer on modern data science methods. Use Python and R to gain powerful, actionable, profitable insights about Advertising and promotion, Consumer preference and choice, Market baskets and related purchases, Economic forecasting, Operations management, Unstructured text and language, Customer sentiment, Brand and price, Sports team performance. And much more.
