Then do all exponents,
Then all multiplication and division **FROM LEFT TO RIGHT**,
Finally, do all addition and subtraction **FROM LEFT TO RIGHT**.

- Suppose that there is a multiplication and no addition operation in a problem. Which operation is done first, and why?
- Suppose there is a subtraction and no addition operation in a problem. Which operation is done first, and why?

Latvia Country Study Guide Volume 1 Strategic Information and Developments IBP USA, 2013-08 *Latvia Country Study Guide Strategic Information and Developments Volume 1 Strategic Information and Developments* *The Public International Law Study Guide for Students* Cristina Veronesi, Sébastien Rosselet, 2014-07-18 A sound understanding of public international law is indispensable for any lawyer whether working in an international or domestic context. It is therefore important that students have a thorough theoretical understanding of international law issues and are able to apply the relevant international legal rules to a given set of facts so as to arrive at a legally coherent conclusion. This practical aspect of learning international law is often neglected in favour of more theoretical aspects which is where this book comes in. The book offers a series of hypothetical practical cases in public international law including some of its specialised branches such as international human rights law and international criminal law. It challenges students to practise and familiarise themselves with the methodology and to write solutions to practical international legal questions. The book is in two parts: part one contains practical exam-like questions while part two contains the solutions. The practical questions in part one are organised by subject such as treaty law or state responsibility. One chapter is dedicated to more complex interconnected cases where students are asked to tackle problems which span multiple potential cases and topics.

ENDORSEMENT An extremely interesting and innovative text that students studying Public International Law should find invaluable. Associate Professor Joanne Sellick, Associate Dean for Teaching and Learning, University of Plymouth.

Maritime Operations Law in Practice David Letts, Rob McLaughlin, 2022-12-09 The law that applies to maritime operations at sea is complex and comprises two distinct elements: treaty law 1982 United Nations Convention on the Law of the Sea and the cases and incidents that occur at sea in both peacetime and during armed conflict which result in the creation of customary international law applicable to maritime operations at sea. Covering sovereignty and vessel status, jurisdiction and interdiction, freedom of navigation, maritime law enforcement and security and the law of naval warfare, this edited collection brings together the most famous and influential cases and incidents at sea. Exploring the entire spectrum of maritime operations from high end war fighting to constabulary operations that are conducted by naval forces and maritime law enforcement agencies at sea to provide the factual circumstances of each case or incident, offering sophisticated analysis and insights into the case or incidents, enduring importance and their significance for the development of the law applicable to maritime operations and offering a detailed account and evaluation of the most critical but rarely understood cases in maritime operations law which encourages comparison between key cases, this book will be an essential reference for practitioners, scholars, teachers and students of maritime operations law.

International Organizations and the Fight for Accountability Carla Ferstman, 2017-08-11 International organizations have increasingly taken on state or quasi state like functions in order to exercise control over individuals and societies most pressingly in contexts of conflict and transition Their engagement in peace operations has progressively widened with mandates now regularly including the protection of civilian populations and in several new operations containing peace enforcement responsibilities with active combat duties This increases the risk that their conduct may infringe human rights and international humanitarian law This book explores the ways in which the principles of accountability and reparation apply to international organizations When considering whether international organizations are obliged to afford reparation and to whom it is owed as well as what it entails we are confronted with the challenge of understanding how the law of responsibility intersects with specialized regimes of human rights and international humanitarian law particularly in its application to individuals The justifications for organizational immunities and other limits on international organizations responsibilities were conceived to ensure IOs independence from state influences and their capacity to engage in often difficult circumstances Many if not all of these rationales remain relevant today yet disciplinary oversight and judicial structures that exist in state administrations to promote accountability and forestall abuses have only partially been put into place for international organizations At the same time individuals affected by their conduct have had no or only cursory recourse to domestic regional and international courts and they have not been able to rely on their states of nationality to pursue claims on their behalf
