

Information Reports

I am **learning** to write a report that will provide information about my subject to the reader.

To be **successful** I will need to...

- clearly explain what I am writing about in my title
- begin with a classification, definition or general comment in my opening statement
- write paragraphs that describe such things as appearance, behaviour, habitat, food, predators and life cycle of the subject
- use factual language
- write in the timeless present tense
- use action verbs to describe behaviours
- summarise the information in my final paragraph
- include tables, pictures, diagrams to add more information
- write an interesting statement to end my report

Ready Made Report In English:

English Dictionaries for Foreign Learners Anthony Paul Cowie, 2002 This is the first history of dictionaries of English for foreign learners from their origins in Japan and East Asia in the 1920s to the computerized compilations of the present Monolingual dictionaries for foreign speakers were a revolutionary development at their outset and now represent a coming together of intellectual technological and commercial forces almost unequalled in book publishing As the author shows the early history of EFL dictionaries was research driven arising directly from research in linguistic theory and language pedagogy now it is user driven determined by what users require or are thought to require The pioneering dictionaries were the work of individuals Current dictionaries are the products of huge databases manipulated by sophisticated processing as publishers strive to share an immense and ever growing global market The book has both a thematic and a chronological structure Three chapters describe the historical sequence over a period of some sixty years These alternate with chapters dealing with phraseology computers and corpus linguistics and research into dictionary users and uses three subjects central to the development of ELT dictionaries over the last thirty years Anthony Cowie examines the way in which availability of massive computing power has transformed the recording and analysis of current speech and shows how the growth of research into the users and uses of dictionaries has led to developments both in ELT lexicography and method This readable and non technical account is directed at professionals in applied linguistics and English language teaching and at lexicographers but it will fascinate everyone concerned with the analysis of English and faced with the challenge of recording the subtleties of its grammar and meaning *Sustainability, the Circular Economy and Digitalisation in the European Textile and Clothing Industry* Martin Wynn, Tina Wiegand, 2025-01-22 This book investigates the nature of the European textile and clothing industry focusing on the relationship between sustainability practices the transition to the circular economy and the deployment of digital technologies It provides a profile of the industry in a range of European countries allowing comparisons and contrasts and the formulation of recommendations for future change and development A mainly inductive qualitative research approach is used in which both secondary sources and primary interview and survey material are analysed to address key research questions and support the development of a model for the assessment of companies in their transition to the circular economy incorporating both upstream and downstream activities in the extended supply chain The book will be of value to undergraduate and postgraduate students in environmental and computer technology disciplines and to professionals and practitioners in the textile and clothing industry **The Perfect Learners' Dictionary (?)** Thomas Herbst, Kerstin Popp, 2011-08-25 This volume undertakes a detailed analysis of the latest generation of learners dictionaries of English It assembles the papers delivered at the eponymous symposium held at the University of Erlangen Nurnberg in April 1997 There are a number of reasons why these dictionaries are of special lexicographic interest 1 the type of learners dictionary associated notably with the name of Hornby can look back on a long tradition in British lexicography 2 competition

between various publishers since the late 70s has given crucial impetus to the development of these dictionaries 3 these new dictionaries are decisively marked by the evaluation of large scale computer corpora Central to the volume is the in depth comparison of four dictionaries published in 1995 OALD5 LDOCE3 COBUILD2 CIDE The aim is to exemplify specific differences of approach in the four dictionaries from a wide range of viewpoints definitions information on valency and collocations policy on usage examples political correctness etc A number of articles also enlarge on the history of learners dictionaries of English the significance of corpus linguistics for lexicography and perspectives for the future notably in connection with the electronic media
