Scott L. Roberts, Charles J. Elfer, 2018-07-01 Teaching and learning through Hollywood or commercial film productions is anything but a new approach and has been something of a mainstay in the classroom for nearly a century Purposeful and effective instruction through film however is not problem free and there are many challenges that accompany classroom applications of Hollywood motion pictures In response to the problems and possibilities associated with teaching through film we have collaboratively developed a collection of practical classroom ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms We believe that film can serve as a powerful tool in the social studies classroom and where appropriately utilized foster critical thinking and civic mindedness The College Career and Civic Life C3 framework represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking reading and writing We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute Our hope is that this edited book might play a small role in the larger project of supporting practitioners specifically K 12 teachers of United States history by offering a collection of classroom ready tools based on the Hollywood or History strategy and designed to foster historical inquiry through the careful use of historically themed motion pictures The book consists of K 5 and 6 12 lesson plans addressing the following historical eras Adapted from UCLA National Center for History in Schools

Reframing the Subject
Kelly Ritter, 2016-01-23 Mental hygiene films developed for classroom use touted vigilance correct behavior morality and model citizenship They also became powerful tools for teaching literacy skills and literacy based behaviors to young people following the Second World War In this study Kelly Ritter offers an extensive theoretical analysis of the alliance of the value systems inherent in mental hygiene films class based ideals democracy patriotism with writing education an alliance that continues today by way of the mass digital technologies used in teaching online She further details the larger material and cultural forces at work in the production of these films behind the scenes and their effects on education trends Through

her examination of literacy theory instructional films policy documents and textbooks of the late 1940s to mid 1950s Ritter demonstrates a reliance on pedagogies that emphasize institutional ideologies and correctness over epistemic complexity and de-emphasize the role of the student in his or her own learning process To Ritter these practices are sustained in today's pedagogies and media that create a false promise of social uplift through formalized education instead often resulting in negative material consequences
