This book offers the first systematic theorisation of transnational public spheres from non-Western spatial and infrastructural perspectives. The current era is characterised by transnational challenges such as climate change, pandemics, and financial crises that cannot be adequately addressed by national public spheres. Public spheres defined as arenas of collective communication and action are the cornerstone of any people-centred system of governance. This book puts forward a transnational public sphere theory and focuses on spatial, infrastructural, and non-Western perspectives, thus adding to the public sphere theory and practice at both national and transnational levels. The author offers a new conceptual construct: the right to space as a way of transnationalising the theory and addressing its efficacy issues. Providing conceptual clarity on the public-private distinction, this book examines the historical roots of the public sphere in both Asia and Europe, establishes the methodological and ontological foundations for a theory of transnational publics, and analyses contemporary

empirical instances of transnational publics in both Asia and the West This transnationalisation is crucial now that authoritarianism is on the rise and democracy is in decline worldwide A timely addition to the literature this book will be of interest to researchers in international relations political science political theory sociology media and communication cultural and literary studies and Asian studies

Offbeat Physics P.I.C. Teixeira, 2022-04-28 Offbeat Physics Machines Meditations and Misconceptions is a collection of articles on various topics in classical physics that have intrigued the author and their students throughout the years The book is divided into three parts Part I Machines comprises chapters that explain or model the workings of a number of machines understood in a broad sense on the basis of physical principles These machines can be as simple as a rolling wheel or as complex as a jet engine Then in Part II Meditations the authors go beyond the standard examples experiments and approximations discussed ad nauseam in most physics textbooks but which are not always very exciting or realistic For example what happens when colliding bodies are not perfectly rigid as we know real bodies are not Finally Part III Misconceptions aims to correct misconceptions that students may have about physical phenomena or clarify issues that are often presented misleadingly confusingly or imprecisely in textbooks such as the relationship between angular momentum and angular velocity in rotational motion This is a book for all those who wish to learn physics beyond the textbooks and from more realistic problems often occurring in engineering contexts It will be useful to instructors at all levels as well as highly motivated students taking General Physics courses in higher education

Least Action Principle of Crystal Formation of Dense Packing Type and Kepler's Conjecture Wu Yi Hsiang, 2001 The dense packing of microscopic spheres i.e. atoms is the basic geometric arrangement in crystals of mono atomic elements with weak covalent bonds which achieves the optimal known density of $\sqrt{2}$ In 1611 Johannes Kepler had already conjectured that $\sqrt{2}$ should be the optimal density of sphere packings Thus the central problems in the study of sphere packings are the proof of Kepler's conjecture that $\sqrt{2}$ is the optimal density and the establishing of the least action principle that the hexagonal dense packings in crystals are the geometric consequence of optimization of density This important book provides a self contained

proof of both using vector algebra and spherical geometry as the main techniques and in the tradition of classical geometry

The Architecture of Home in Cairo Mohamed Gamal Abdelmonem, 2016-03-03 The hawari of Cairo narrow non straight alleyways are the basic urban units that have formed the medieval city since its foundation back in 969 AD Until early in the C20th they made up the primary urban divisions of the city and were residential in nature Contemporary hawari by contrast are increasingly dominated by commercial and industrial activity This medieval urban maze of extremely short broken zigzag streets and dead ends are defensible territories powerful institutions and important social systems While the hawari have been studied as an exemplar for urban structure of medieval Islamic urbanism and as individual building typologies this book is the first to examine in detail the socio spatial practice of the architecture of home in the city It investigates how people live communicate and relate to each other within their houses or shared spaces of the alleys and in doing so to uncover several new socio spatial dimensions and meanings in this architectural form In an attempt to re establish the link between architecture past and present and to understand the changing social needs of communities this book uncovers the notion of home as central to understand architecture in such a city with long history as Cairo It firstly describes the historical development of the domestic spaces indoor and outdoor and provides an inclusive analysis of spaces of everyday activities in the hawari of old Cairo It then broadens its analysis to other parts of the city highlighting different customs and representations of home in the city at large Cairo in the context of this book is represented as the most sophisticated urban centre in the Middle East with different and sometimes contrasting approaches to the architecture of home as a practice and spatial system In order to analyse the complexity and interconnectedness of the components and elements of the hawari as a collective home it layers its narratives of architectural and social developments as a domestic environment over the past two hundred years and in doing so explores the in depth social meaning and performance of spaces both private and public
