Wagner,2015-12-14 Charlemagne s Christianisation of the pagans in the Dark Ages of Medieval Europe was brutal enough It could have been far worse without Waldo a more considered Christian by his side Who was Waldo I hear you ask An original document written in Latin on sheepskin in the early middle ages verifies the donation of a

Christian church by a certain Waldo in Seeburg a small village in Southern Germany No further historic records of this mysterious Waldo existed So I spent two years of intense research to unravel his alleged identity I concluded that Waldo and Charlemagne the mighty Carolus Magnus Charles the Great were like the priest and the soldier who shared a lifelong bond forged in childhood They saw themselves as Christianity s cross and sword put on earth by God to build and defend Christendom in medieval Europe Both men differed in their approach to converting the pagans Charlemagne the soldier believed in a swift decision and the beheading by sword of the unwilling My god is your god My will be done Waldo the priest believed in a more gentle missionary way bringing salvation with bread wine and fear of the unknown and the promise of a better life in heaven Jesus died for us on the cross for our redemption Thy kingdom come Amen They also shared a terrible secret known only to themselves and God It s a secret that history failed to uncover in the last 1250 years The Greatest

Denise Phillips, 2024-05-31 Although many of the practical and intellectual traditions that make up modern science date back centuries the category of science itself is a relative novelty In the early eighteenth century the modern German word that would later mean science naturwissenschaft was not even included in dictionaries By 1850 however the term was in use everywhere Acolytes of Nature follows the emergence of this important new category within German speaking Europe tracing its rise from an insignificant eighteenth century neologism to a defining rallying cry of modern German culture Today s notion of a unified natural science has been deemed an invention of the mid nineteenth century Yet what Denise Phillips

reveals here is that the idea of naturwissenschaft acquired a prominent place in German public life several decades earlier Phillips uncovers the evolving outlines of the category of natural science and examines why Germans of varied social station and intellectual commitments came to find this label useful An expanding education system an increasingly vibrant consumer culture and urban social life the early stages of industrialization and the emergence of a liberal political movement all fundamentally altered the world in which educated Germans lived and also reshaped the way they classified knowledge
