*Achieving Against the Odds* Esther Kingston-Mann,R. Timothy Sieber,2001-05 High school was like a penance imposed for some unknown sin Everything I ever learned that was important was learned outside of school So I never thought to associate schools with learning Amy UMass Boston student Today s diverse and financially burdened students enter higher education eager to succeed at institutions originally designed for culturally homogenous and predominantly white middle class populations They are expected to learn from faculty trained primarily as researchers Unsurprisingly student dropout and faculty burnout rates are high leading some conservatives to demand that higher education purge itself of unqualified students and teachers But as *Achieving Against the Odds* demonstrates new and better solutions emerge once we assume that both faculty and students still possess a mutual potential for learning when they meet in the college classroom This collection drawing on the experiences of faculty at the University of Massachusetts Boston documents a complex and challenging process of pedagogical transformation The contributors come from a wide range of disciplines American studies anthropology Asian American studies English ESL history language political science psychology sociology and theology Like their students they bring a variety of backgrounds into the classroom as people of color women gays working class people and foreigners of one sort or another Together they have engaged in an exciting struggle to devise pedagogies which respond to the needs and life experiences of their students and to draw each of them into a dialogue with the content and methodology of their disciplines Courageously airing their own mistakes and weaknesses alongside their breakthroughs they illuminate for the reader a process of teaching transformation by which discipline trained scholars discover how to promote the learning of diverse students As one reads their essays one is struck by how much these faculty have benefited from the insights they have gleaned from colleagues as well as students Through argument and examples personal revelation and references as well as students Through argument and examples personal revelation and references to authority they draw the reader into their community This is a book to inspire and enlighten everyone interested in making higher education more truly democratic inclusive and intellectually challenging for today s students

**Project Management for Research** Adedeji B. Badiru,Christina F. Rusnock,Vhance V. Valencia,2016-04-21 Graduate research is a complicated process which many undergraduate students aspire to undertake The complexity of the process can lead to failures for even the most brilliant students Success at the graduate research level requires not only a high level of intellectual ability but also a high level of project management skills Unfortunately many graduate students have trouble planning and implementing their research **Project Management for Research A Guide for Graduate Students** reflects the needs of today s graduate students All

graduate students need mentoring and management guidance that has little to do with their actual classroom performance. Graduate students do a better job with their research programs if a self-paced guide is available to them. This book provides such a guide. It covers topics ranging from how to select an appropriate research problem to how to schedule and execute research tasks. The authors take a project management approach to planning and implementing graduate research in any discipline. They use a conversational tone to address the individual graduate student. This book helps graduate students and advisors answer most of the basic questions of conducting and presenting graduate research, thereby alleviating frustration on the part of both student and advisor. It presents specific guidelines and examples throughout the text, along with more detailed examples in reader-friendly appendices at the end. By being more organized and prepared to handle basic research management functions, graduate students along with their advisors will have more time for actual intellectual mentoring and knowledge transfer, resulting in a more rewarding research experience.
