

Personal SWOT Analysis – Oneself / Myself

7 pages | 1613 words

To be successful in today's competitive world it's absolutely essential for one to be able to identify the strengths and weaknesses of oneself, as well as the opportunities and threats that are presented. By having awareness of these four aspects, it's possible to use them for one's advantage. If a person can identify and understand their strengths and opportunities they will know where to tread with confidence and security. However, if one can realize the weaknesses and threats posed to them, it's possible to focus on those areas so to improve upon weaknesses and overcome obstacles posed by threats.

Strengths

My personal strengths generally involve my ability to be innovative and creative, as well as keeping an open mind. These three parts enable me to be much more efficient and effective in my ways compared to those of my peers as well as others in my general environment. Being open to new ideas is an extremely good way to be adaptive to new situations. Adaptation is an essential ability in a world that is constantly changing and forming. Innovation and creativity are tools that can help me in advancing within my career. My innovation in particular allows me to stand out in my environment because it is a knowledge-intensive quality, which exemplifies my education and abilities (Kinicki & Williams, 2009). Creativity and Innovation both allow me to advance ahead of my competition and have an upper hand in my field. Having good, quality resources can be a very helpful key to success. My personal resources don't run particularly high in quantity, but I believe high quality resources are more important. My number one most important and main personal resource that I have is my education and experience. Resources are capital in a competitive field. The more, better resources you have, the better the chance you have of being successful and outdriving your competition, but resources often have competition surrounding them as well (Kinicki & Williams, 2009). Education is an example of a competitive resource, knowledge is essential for success. My ability to advance and apply my education and knowledge in the field is a key to my personal success. I believe that others view my strengths as my social skills and my ability to adapt to situations. I agree that I do have strength in my adaptability skills, however not the social part. I think of my social skills as more of a weakness, but I try to improvise by outgoing and positive, so that it may be seen as a strength of mine. My strengths are the key to my success and achievements.

Weaknesses

Weaknesses are inevitable when it dealing in a competitive environment. Weaknesses in an organization can be defined as "the drawbacks that hinder an organization in executing strategies in pursuit of its mission" (Kinicki & Williams, 2009 p.180). This definition stays true when dealing with individuals. Whatever can hold back someone from being competitive with others can be a weakness. Weaknesses are also any positive skills that your competitors may have but you don't which helps them but may not necessarily harm you. My weaknesses are...

CRM Market Research Social Media grade 1 0 University of Applied Sciences Berlin language English abstract Marketing offers numerous valuable tools to analyze a company's current situation. Though most of them have the weakness of providing only a very isolated view that is not suitable for a long-term entrepreneurial decision. The SWOT analysis however pursues an integrated approach including key company and environmental variables. The objective is the confrontation of the company's internal strengths and its weaknesses as well as company external business opportunities and risks in order to generate possible strategic options. The SWOT analysis particularly supports a combined and integrated approach of the current company situation enabling well-balanced and comprehensive decisions. One main benefit is thus the reduction of complexity through the integrated approach leaving the key factors and strategies as analytical residue. In practice the SWOT method is a well-established tool to analyze business units in larger companies and smaller start-ups in particular during their launch. The SWOT analysis though reveals limited possibilities when analyzing all business units of large companies. For this task other more holistic approaches as the share holder value concept or the portfolio analysis are appropriate. However this large field of tools will not be treated in this assignment. The SWOT analysis is though despite its disadvantages one of the most important instruments for the internal analysis of a company's situation that in every case delivers a pretty comprehensive and resilient foundation for further entrepreneurial decisions and strategic planning.
