This book has been replaced by *Social Psychology Third Edition* ISBN 978 1 4625 4398 4 [Competing Models of Linguistic Change](#) Ole Nedergaard Thomsen,2006-10-25 The articles of this volume are centered around two competing views on

language change originally presented at the 2003 International Conference on Historical Linguistics in the two important plenary papers by Henning Andersen and William Croft The latter proposes an evolutionary model of language change within a domain neutral model of a generalized analysis of selection whereas Henning Andersen takes it that cultural phenomena could not possibly be handled i e observed described understood in the same way as natural phenomena These papers are models of succinct presentation of important theoretical framework The other papers present and discuss additional models of change e g invisible hand processes system internal models functional and cognitive models Most papers do not subscribe to the evolutionary model instead they focus on functional factors in the selection and propagation of variants as opposed to factors of code efficiency or on cognitive and pragmatic perspectives Several papers are inspired by the late Eugenio Coseriu and by Henning Andersen s theories on language change In particular the volume contains articles proposing interesting grammaticalization studies and extended models of grammaticalization The clear presentation of important and competing approaches to fundamental questions concerning language change will be of high interest for scholars and students working in the field of diachrony and typology The languages referred to in the papers include Cantonese the Chukotko Kamchatkan languages Danish English Eskimo languages German Norwegian Russian Spanish and Swedish

Personality and Neurosurgery J. Brihaye,L. Calliauw,F. Loew,R. van den Bergh,2012-12-06 The human personality is inextricably bound up with among other things the function of the central nervous system Diseases and malfunctions of the brain head injuries and neurosurgical operations can all result in permanently altered behaviour patterns This interrelation between brain and behaviour is most clearly demonstrated in cases involving functional neurosurgery and severe traumatic lesions Despite the fact that this interrelation represents an everyday challenge to the neurosurgeon it is a question which receives less attention than it deserves in neurosurgical meetings Given the scope and complexity of this topic it is not possible to cover every aspect of it here hence discussion is limited to the impact on personality of injuries language epilepsy and psychosurgery However before considering the medical aspects it was deemed necessary to try and arrive at a definition of personality This question was discussed by a number of philosophers representing various perspectives Their diversity of viewpoints and conceptions greatly enriched the discussions
