Rampant consumer capitalism ongoing failures in education hyper individualism postmodernist moral relativism and other aspects of American culture are all contributing to the chaotic terrain that emerging adults must cross Smith identifies five major problems facing very many young people today confused moral reasoning routine intoxication materialistic life goals regrettable sexual experiences and disengagement from civic and political life The trouble does not lie only with the emerging adults or their poor individual decisions but has much deeper roots in mainstream American culture a culture which emerging adults have largely inherited rather than created Older adults Smith argues must recognize that much of the responsibility for the pain and confusion young people face lies with them Rejecting both sky is falling alarmism on the one hand and complacent disregard on the other Smith suggests the need for what he calls realistic concern and a reconsideration of our cultural priorities and practices that will help emerging adults more skillfully engage unique challenges they face Even handed engagingly written and based on comprehensive research Lost in Transition brings much needed attention to the darker side of the transition to adulthood

provides practical guidance for managers leaders diversity officers educators and students to achieve the benefits of diversity by focusing on creating meaningful inclusive interactions Implementing inclusive interaction practices along with accountability practices enhances performance outcomes for the organization and improves equity for members of historically underrepresented and marginalized groups The book highlights the need to challenge existing approaches that have overemphasized representational that is numerical diversity For many decades the focus has been on this important first step of increasing the numbers of underrepresented groups However moving beyond representation toward a truly inclusive organizational culture that produces real performance and equity has been elusive This book moves the focus from achieving numerical diversity to achieving frequent high quality equitable and productive interactions that enable individuals to leverage their distinctive talents and provides the steps to do so The benefits of this approach occur at the individual workgroup and organizational levels Real life examples of good inclusive practices are provided from across the for profit nonprofit and governmental sectors and in various organizational contexts The book is ideal not only for those charged with diversity equity and inclusion efforts in organizations but also for organizational leaders and managers who can create and or support the implementing of inclusive organizational practices and also for postgraduate and undergraduate students

studying human resource management organizational behavior management or diversity equity and inclusion Moving Beyond the Comfort Zone in Psychotherapy Nancy A. Bridges, 2005 Making emotional contact and inviting patients to use therapeutic relationships for their relational and developmental aims is a risky and intimate proposition But as the author of this book argues therapists must be willing to engage deeply with patients to work from within the relationship extending the therapeutic relationship to reach the private experience of self and other and offer new relational experience Moving beyond traditional thinking the author presents a relational approach that integrates psychoanalytic thinking with the latest findings from infant research to give therapists the theoretical framework to orient the treatment and maintain psychic equilibrium and safety during times of arousing and destabilizing affect and relational scenarios A therapeutic stance which is fluid and open to intrapsychic and interpersonal influence allows for the experience and elaboration of complex unconscious affects and shifting points of identification Compelling clinical narratives bring the reader into the consulting room and show how the therapist may forge deep emotional connection within a bounded therapeutic relationship that relies upon mutual influence and self revelation and opens up relational space to ultimately rearrange a patient s experience of self and other
