Secrets of the Snout Frank Rosell, 2018-04-13 Dogs and humans have worked side by side for thousands of years and over the millennia we've come to depend upon our pooches as hunters protectors and faithful companions But when it comes to the extraordinary quality of man's best friend which we rely on most the winner is clear by a nose In *Secrets of the Snout*

Frank Rosell blends storytelling and science as he sniffs out the myriad ways in which dogs have been trained to employ their incredible olfactory skills from sussing out cancer and narcotics to locating endangered and invasive species as well as missing persons and golf balls. With 300 million receptors to our mere 5 million, a dog's nose is estimated to be between 100,000 and 100 million times more sensitive than a human's. No wonder then that our nasally inferior species has sought to unleash the prodigious power of canine shnozzes. Rosell here takes us for a walk with a pack of superhero sniffers including Tutta a dog with a fine nose for fine wine, the pet finder pooch AJ, search and rescue dog Barry, the hunting dog Balder, the police dogs Rasko and Trixxi, the warfare dog Lisa, the cancer detection dog Jack Tucker who scents floating killer whale feces, and even Elvis who can smell when you're ovulating. With each dog, Rosell turns his nose to the evolution of the unique olfactory systems involved, which odors dogs detect, and how they do it. A celebration of how the canine sense for scents works and works for us, *Secrets of the Snout* will have dog lovers, trainers, and researchers alike all howling with delight. Exploring this most pointed of canine wonders, Rosell reveals the often surprising ways in which dogs are bettering our world, one nose at a time.
