Psychology 4e Douglas A. Bernstein, Julie Ann Pooley, Lynne Cohen, Steve Provost, Jacquelyn Cranney, Neil Drew, 2023-11-03 Bernstein's Psychology takes a balanced approach to the discipline of psychology. The content of the text ranges across the history of psychological theories that aim to understand human behaviour from cell to society and includes multidisciplinary approaches. All content and assessment material is carefully constructed to develop the requisite skills to evaluate human behaviour with a scientific attitude. Linkages across the text help students to see a holistic picture and interrelated fields of psychology. Graduate competencies and psychological literacy continue to be a unique inclusion so that students master the knowledge, skills and professional attributes required to practise psychology competently and safely. Indigenous and cross-cultural psychology content is covered in two chapters as well as being integrated throughout the text with a key focus on local research and examples. This edition expands this focus to review the development of Indigenous psychology and the growing number of Indigenous psychologists currently practising in Australia via snapshots, linkages, statistics and examples. Instructor resources include Instructor's Manual, PowerPoint, Test Bank and active learning. Premium online teaching and learning tools are available on the MindTap platform. Teacher Development in India Vijaya Sherry Chand, Samvet Kuril, Ketan Satish Deshmukh, 2022-10-31 This volume shows how grassroots educational innovations and technology can be brought together in a fresh approach to human resource development in public social services. Based on a three-decade-long engagement with innovation in public education, this book provides an illustration of how teacher-driven innovations can be transformed into learning objects for technology-based professional development. It describes how innovations can be identified, screened and validated and disseminated through two mechanisms: a clearinghouse-based approach and grassroots innovation fairs. It then demonstrates how these innovations can form the backbone of a third-space problem-based learning curriculum which can be delivered through a technology platform for large-scale professional development. The book offers guidance on practical ways of doing this and on evaluating the curriculum's impact with case studies of programmes that covered thousands of teachers. This book will be of interest to teachers, students and professionals in education, teacher education, digital education, information technology, communication and media studies. It will also be useful to educationists, policymakers, teacher educators, educational institutions, online education centres and practitioners involved in professional development education and training in developing countries.
