New Perennial Planting Guide For Novices And Dummies Sandra Bronson,2020-11-13 Perennials are plants that live for at least 2 consecutive years Technically herbaceous perennials die back in the fall and winter but most gardeners use them to describe plants Perennials typically bloom during their growing season and die back in the fall and winter turn their foliage green again next spring Some perennials live for 2 years while others may live for thousands of years Unlike annuals which last only a single growing season and depend on being replanted each year, perennials grow from seedlings enabling them to bloom through multiple growing seasons There are hundreds of different types of perennials which vary in size from less than 1 inch tall to more than 30 feet tall Some perennials flower abundantly while others are more delicate and graceful They differ in their growth habits Upright, trailing, creeping, and many other garden designs can be achieved with perennials In some regions, deciduous trees and late spring plants have the reputation to become established before they flower Deciduous trees do not lose their leaves while evergreens shed their needles in winter Dip below 25 degrees Fahrenheit 389 degrees Celsius perennials in the ground but don't kill with plants that die out If you haven't lost your perennials in the winter with frost it's 2 to 3 weeks Plant perennials in the fall before the first frost Perennials planted after the first frost will not survive because their root system does not have time to get established before the ground freezes Research a perennial to determine when its ideal planting time The best time to plant perennials varies depending on the climate A good rule of thumb is to consult a professional at a local garden center about the best time to plant a particular perennial Evaluate whether the perennials you want to grow in your location in the garden For example, if you're planting around a tree, consider grouping them under the canopy of the tree Determine how much sunlight the area receives This will be an important factor in selecting the perennials to be grown in the location
